Campos EPC ENGINEARME is a week long STEM program from June 3 - 8 at CU Boulder offering current highschool juniors an opportunity to explore everything engineering has to offer. Engineering is about making a world of difference; it’s about developing creativity and imagination. If you want to learn how to harness your creativity or how you can make an impact, apply today for this opportunity. All costs are covered by CU Boulder.

Open to students interested in engineering and in contributing to a diverse community

A full week of hands-on engineering projects and college experience

Housing provided on CU Boulder campus

$2500 scholarship if you participate and accept admission to CU Engineering
