Research Output	<ul style="list-style-type: none">• “From Reds to Blues, and Green to Brown: Unraveling Firms’ Political Ideologies and ESG Disclosures’ Transparency” (<i>With Ali Jafarzadeh</i>); <i>Data Collection Phase</i> This proposed study endeavors to explore the potential relationship between firms’ political ideologies, as gauged by their executive teams’ political party donations and contributions and their non-financial reporting practices. We hypothesize that firms whose executive team’s political ideology is aligned with republicans (democrats) tend to obfuscate (transparentize) their ESG performance by publishing complex (readable) ESG disclosures.• “Influence of Corporate Governance on the Potential and Valuation of Private Equity LBO Deals” (<i>With Amir Tayebi</i>); <i>Working Paper</i> This paper aims for examining the target firms’ corporate governance impacts on public-to-private LBO deal likelihood. In particular, we are interested in the role that board of directors’ composition of targeted firms play on the likelihood, terms, and structure of the deal.• “Policy Uncertainty Impacts on Private Equity Funds Buyout Activity” (<i>With Amir Tayebi</i>); <i>Under Submission</i> <i>Presented at: Southern Economic Association 93rd Annual Meeting, 2023, LA</i>• “The Impact of Oil Revenue Shocks on the Volatility of Iran’s Stock Market Return” Authors: Sina Davoudi, Alireza Fazlzadeh, Firouz Fallahi and Hossein Asgharpour. <i>International Journal of Energy Economics and Policy</i>, 8 (6), 102-110
