

Accounting Emphasis Guide

Career Guide

EXPLORE

The accounting area of emphasis is designed to prepare students for careers in accounting, general and financial management, financial analysis, taxation, auditing, and accounting information systems.

There are typically two initial placement options upon graduation, beginning your career in corporate accounting, or earning your Certified Public Accountants (CPA) certification for public accounting.

The CPA requires extra coursework to get to 150 credits – students have the option to go for a 5th year Masters Program.
