Center for Asian Studies

UNIVERSITY OF COLORADO **BOULDER**

# CAS Asia Internship Program

The state of Colorado's economy is more connected to Asia than to Europe. Half of Colorado's top ten trading partners are Asian, with China coming in at number three. Students can learn about the business culture and practices of these important partners through immersion in real-world work environments, all the while experiencing an Asian culture in a unique and hands-on way.

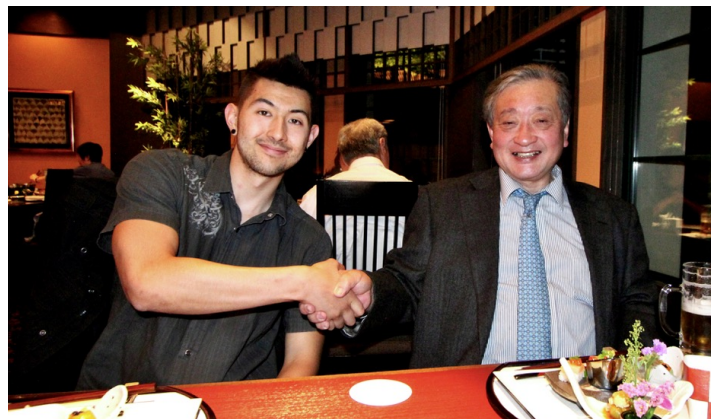

- 6 to 8-week summer internships in Tokyo and Shanghai, with opportunities to expand into other Asian cities
- Arranged by CAS through a network of CU friends and alumni, helping keep costs low
- Scholarships provided by alumni and donors available
- Official CU Education Abroad program
- Students may earn up to 6 credits

"The internship changed the way I think, and I believe it has changed the path that I want to take in life. The things I experienced will stay with me forever and I will use those experiences to better myself as a person."

Francisco Kaito Padilla, Summer 2016 Intern

Francisco with his internship host, CU alumnus Kazunori Takato.
