Link to our Team Member Handbook: [AirMason](#)

### **Build your future together.....**

Are you interested in the opportunity to work for an industry-leading company that will give you the experience and exposure you need to build your career and personal brand? If so, then you've come to the right place!

### **General Summary**

This is a three-month assignment where you will assist a Branch Manager with field crane activities from order intake to completion.

A crane intern is responsible for carrying out day-to-day administrative field work as directed. Typical duties of a crane intern include performing data entry, assisting crane managers and lead operators, visiting crane sites and learning the trade, preparing plans, drawings and 3D models with the use of software.

### **Essential Job Accountabilities**

Communicate with fellow Team Members to learn about field crane, rigging and heavy haul operations and provide support.

Establish and maintain working relationships with operations, sales, dispatch, EHS, administration and accounting.

Assist with project environmental, health and safety requirements.

Assist project engineering in the design and safe execution of project deliverables.

Use 3D Life Plan software as directed by engineering.

Assist Administration in the generating and distribution of daily cost reports.

Assist Administration in the tracking & reporting of project completion.

Maintain a to-do list and diary.

**What are we seeking?**

Individual who wants to get dirty learning the crane business.

Individual seeking a Bachelor's degree in Construction Management or Engineering.
