Open Rank Faculty Positions in Environmental Engineering – Water Sustainability

The Environmental Engineering (EVEN) Program at the University of Colorado Boulder is currently seeking applications for two (2) tenure track faculty positions in the area of Water Sustainability. These positions are part of the long-term growth plans for the program, focusing in this area. These positions will complement two positions filled during the last year and are open at all levels with special consideration given to applicants at the Assistant Professor level. Ideally, candidates should have teaching and research interests in 1) environmental analytical chemistry or 2) issues relating to water reuse in the areas of environmental microbiology (e.g., microbial pathogens), toxicology, and systems analysis (e.g., energy and resource recovery).

The positions will be rostered in the Department of Civil, Environmental and Architectural Engineering (CEAE). Candidates must have an earned Ph.D. or equivalent degree in environmental engineering or a related field. Professional registration or an ability to become a registered professional engineer is desirable, but not required. The EVEN Program is one of the largest in the nation, with 19 full-time program faculty, over 220 undergraduate students, and over 70 graduate students. For information about the EVEN Program, please visit: http://www.colorado.edu/even/. For more information about the CEAE Department, please visit: http://www.colorado.edu/ceae/.

Successful candidates will be expected to engage in undergraduate and graduate teaching, contribute professional service, and develop a vigorous, externally-funded research program in their technical areas while fostering collaboration with other faculty. Candidates whose expertise cuts across engineering disciplines are especially encouraged to apply. In their application candidates should describe their interests in teaching, graduate student researcher training, and their plans to develop a recognized research program based on scholarly work in their field.

Inclusiveness and diversity are valued characteristics of the faculty and students in the EVEN program, as well as primary objectives of the College of Engineering and Applied Science and the University of Colorado Boulder campus.
The University of Colorado is an Equal Opportunity Employer committed to building a diverse workforce. We encourage applications from women, racial and ethnic minorities, individuals with disabilities and veterans. Alternative formats of this ad can be provided upon request for individuals with disabilities by contacting the ADA Coordinator at: hr-ada@colorado.edu.

Application materials are accepted electronically at https://www.jobsatcu.com. The University of Colorado is an Equal Opportunity/Affirmative Action employer.

Applicants must submit their applications on-line at CU Careers (https://jobs.colorado.edu) for Job Posting Number 12874. Application materials must be uploaded as a single PDF file containing the following: a cover letter stating your research area (1 page), names and contact information for three to five references (1 page), a curriculum vita, and statements describing your goals related to teaching and research (2 pages each).

Review of applications will start on November 12th, 2018 and will continue until the positions are filled.
