Engineer-In-Training

Nelson Forensics, LLC (Nelson) is a progressive, multi-disciplined consulting firm dedicated to providing world-class responsiveness and expert solutions to a complex array of forensic problems. Nelson has built a rock-solid reputation for providing detailed and fact-based investigations for property owners, for the insurance industry, and in the legal arena. Nelson's highly skilled team of professionals assess damage from perils such as hurricanes, tornadoes, earthquakes, explosions, fires, windstorms, hail, structural failures, design defects, and construction defects. We also provide remedial solutions to remediate such damage. Nelson is currently looking for creative and innovative engineering graduates to join our team.
