Protocol #20-0309

# Participate in a Paid Study on Cannabis and Memory!

In this study, we want to understand how varying levels of cannabinoids (e.g., THC and CBD) impact things like your memory and cognition. To better understand the effects of varying levels of cannabinoids, we ask you to provide blood samples.

You will be compensated up to \$195

## You may be eligible to participate if you:

- Are 21-40 years old
- Have used cannabis for at least 1 year
- Are right-handed

## This study involves:

- 1 appointment at our lab facility in Boulder
- 2 appointments in our mobile lab (we drive to a location convenient to you)
- Blood draws
- EEG recording
- Cognitive tasks
- Brief questionnaires

*If you are interested, please contact CUChange at:*
