

MOOC "Planning & Design of Sanitation Systems and Technologies"

Eawag-Sandec in collaboration with EPFL, the World Bank Water and Sanitation Program and the World Health Organization are launching the new revamped online course about urban sanitation on October 17.

About the course

Do you want to learn how to plan affordable and context-specific sanitation solutions? This course deals with citywide planning and programming and focuses on specific contexts such as informal settlements. It covers the whole sanitation chain providing detailed information about appropriate sanitation systems and technologies. For the second round of this course, we have added new modules about recent developments and other key issues in urban sanitation, including those regarding institutional and financial arrangements, behaviour change, sanitation safety planning, and fecal waste flow diagrams.

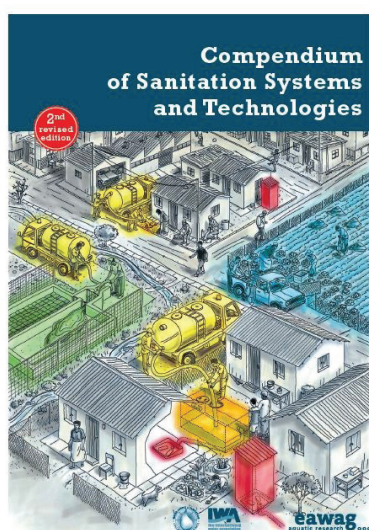

- **Week 1:** Introduction to sanitation planning & systems approach
- **Weeks 2&3:** Sanitation systems & technologies
- **Week 4:** Urban sanitation solutions - Case studies
- **Week 5:** Urban sanitation tools

Sign up

The course is offered for free in English and French with subtitles in Spanish and Hindi. Please visit the course pages to sign up.

- **Course in English:** www.coursera.org/learn/sanitation
- **Course in French:** www.coursera.org/learn/sanitation-fr

The course will constantly run on the internet platform Coursera and you can sign up any time to join a course session. The course lecturers will mainly interact on the forum during the first session (17.10.-27.11.2016). If you are new on Coursera, you can create a free Coursera account directly on the course page.

In this course, you will learn among others how to best use the renowned Compendium of Sanitation Systems and Technologies

Course at a glance

- 1st session:** 17 October - 27 November 2016
- Costs:** The course is free
- Workload:** 4 - 6 hours/week
- Languages:** English, French
- Subtitles:** Spanish, Hindi, English, French
- Partners:** Eawag-Sandec, École polytechnique fédérale de Lausanne (EPFL), World Bank Water and Sanitation Programme, WHO
- SoA:** The Statement of Accomplishment is provided for free by Eawag-Sandec. It is not a paid Coursera certificate.

Help us to spread the word

Do you have friends and colleagues, who might be interested? Do you have a blog, a facebook page or a website, where you could help us to spread the word? Please write us an email (fabian.suter@eawag.ch) and we'll be glad to send you the course advertisement materials.

MOOC series "Sanitation, Water and Solid Waste for Development"
