

Assignment: Due Tuesday, March 30, 2021

Study the ICRISAT report entitled "Farmer Participatory Integrated Watershed Management: Adarsha Watershed, Kothapally India" and answer the following questions:

- a. Has this watershed management project been successful in terms of sustainability? In what ways, yes, and what ways not? (Specifically, how has this project provided adequate and sustainable access to assets and resources necessary to satisfy the target group's basic human needs?)
- b. To what extent has community involvement been part of this project? What has this helped achieve?
- c. Develop a basic problem tree from the baseline survey results (top of p. 8) and a solution tree based on your problem tree.
- d. Attempt to develop a CLD that best describes the watershed management dynamics described in this paper.
