Meet Flower Darby

(she/her)

In Brief

- 01 | Assessment & Cheating Challenges
- 02 | Two Central Principles of Equity
- 03 | Two Assessment Design Frameworks
- 04 | A Step-by-Step Process
- 05 | Questions and Conversation

What is **one word** that comes to mind regarding assessing student learning in an AI age?

Photo by Gabrielle Henderson on Unsplash

How do we make a
valid assessment
of student learning
in an AI age?

Assessment has been a
problem for a long time

We can't tell what
students know

Our assessments are out
of alignment

Dance vs. English

English vs. Ed Tech

Ed Tech vs. students' jobs

We have an opportunity

Critical reflection

Are our assessments
aligned effectively?

Are we helping students
choose integrity?

Cheating is
easier than ever

This is
nothing new...

we've always
found ways to
save time and effort

~~Students~~ People are
more **tempted** to
cheat when

low **value**

don't care
about the material

stakes are **too high**

instructor is **uncaring**

We can design
for integrity

We can design
for validity

We can design
for equity

Two Central Principles

Transparency

Let's be clear
with students

TILT

Transparency in Learning and Teaching

tilthighered.com

Trust

Let's build
trust-filled
environments

A unique
moment
in time

Pause and Reflect

Two Frameworks: Pairing the Old and New

Backward Design: Start with the End in Mind

The AI Assessment Scale: A Conversation Starter

Perkins et al., 2024

Move beyond the
binary of no AI / all AI

Help make a valid
assessment of
student learning

The AI Assessment Scale

1	NO AI	<p>The assessment is completed entirely without AI assistance in a controlled environment, ensuring that students rely solely on their existing knowledge, understanding, and skills</p> <p>You must not use AI at any point during the assessment. You must demonstrate your core skills and knowledge.</p>
2	AI PLANNING	<p>AI may be used for pre-task activities such as brainstorming, outlining and initial research. This level focuses on the effective use of AI for planning, synthesis, and ideation, but assessments should emphasise the ability to develop and refine these ideas independently.</p> <p>You may use AI for planning, idea development, and research. Your final submission should show how you have developed and refined these ideas.</p>
3	AI COLLABORATION	<p>AI may be used to help complete the task, including idea generation, drafting, feedback, and refinement. Students should critically evaluate and modify the AI suggested outputs, demonstrating their understanding.</p> <p>You may use AI to assist with specific tasks such as drafting text, refining and evaluating your work. You must critically evaluate and modify any AI-generated content you use.</p>
4	FULL AI	<p>AI may be used to complete any elements of the task, with students directing AI to achieve the assessment goals. Assessments at this level may also require engagement with AI to achieve goals and solve problems.</p> <p>You may use AI extensively throughout your work either as you wish, or as specifically directed in your assessment. Focus on directing AI to achieve your goals while demonstrating your critical thinking.</p>
5	AI EXPLORATION	<p>AI is used creatively to enhance problem-solving, generate novel insights, or develop innovative solutions to solve problems. Students and educators co-design assessments to explore unique AI applications within the field of study.</p> <p>You should use AI creatively to solve the task, potentially co-designing new approaches with your instructor.</p>

The AIAS in brief

01 | No AI

02 | AI Planning

03 | AI Collaboration

04 | Full AI

05 | AI Exploration

Did a student go a
little heavy on the AI use?

The AIAS

(Perkins et al., 2024)

A step-by-step process to
update one assignment

Meaningfully Integrating AI

01 | Review your course learning goals

Meaningfully Integrating AI

01 | Review your learning goals

02 | Pick one assignment or project

Meaningfully Integrating AI

- 01 | Review your learning goals
- 02 | Pick one assignment or project
- 03 | Using the AIAS, determine what level of AI use is appropriate

Meaningfully Integrating AI

- 01 | Review your learning goals
- 02 | Pick one assignment or project
- 03 | Using the AIAS, determine what level of AI use is appropriate
- 04 | Identify where AI might be useful

Meaningfully Integrating AI

- 01 | Review your learning goals
- 02 | Pick one assignment or project
- 03 | Using the AIAS, determine what level of AI use is appropriate
- 04 | Identify where AI might be useful
- 05 | Carve out time to discuss with your students and model AI use

Considerations

What is your comfort level
with AI in general?

What is your comfort level
with AI in your discipline?

What is the level of
your course?

In what part of the term is the assessment happening?

What will help you make a
valid assessment of student
learning?

What resources are
available to help you?

Where do
you want to
begin?

Questions and Conversation

Small Teaching with AI

Equitable Strategies to Help
Students Engage and Learn

What is **small teaching**?

How are we **feeling** about
teaching with AI?

All over the map

There are
no easy
answers

A journey,
not a solution

What we know

Students need
foundational knowledge

Students need AI skills

Small teaching can help

Ethical Concerns and Opportunities

Environmental
costs

Human labor
exploitation

Amplification of biases

Unequal access

Unequal
accusations

Ethics and Our Why

To level the
playing field

A solid red square is positioned on the left side of the slide, partially overlapping the text.

To address the
rich getting richer

To support
job-seekers

To develop
engaged citizens

Start Small

Play with Generative AI tools

Generative AI: FGWC

Get help in the kitchen

Be transparent
with students

What **syllabus**
statement do you have?

How are you
talking with
students about AI?

Take a 2-part
approach

- 
1. Assign an AI task
 2. Students **do something**

Analyze
AI-generated
output

Have AI write
a celebration
speech

Design a perfect
government

Engage your
equity partner

Extend understanding

Explain statistics
in a poem

Assign
connection
notebooks

Make an AI
sandwich

Structure
metacognitive
problem-solving
