

## Clinical Nutrition Course Description

- Exploration of clinical nutrition concepts from a health care provider perspective.
- Examines how and why diseases develop and what nutritional therapy and intervention is appropriate for disease resolution.

### Goal:

- Redesign **written assignments** and the **final project** with special attention paid to:
  - Transparency
  - Authenticity & relevance
  - Inclusiveness
  - Rigor
  - Support

### Written Assignments:

- Modified Diet Experience
- Case Study: Menu Planning Using Carbohydrate Counting
- Case Study: Menu Modification for Burn Injuries
- Case Study: Patient with Cardiovascular Disease

### Final Project (Group):

Critical analysis of a clinical nutrition topic, as chosen by students

### Ask us about:

- what we learned about **student-faculty partnerships**
- increasing student **engagement** through a focus on **relevance** in assignments
- how we addressed the balance between assignment **rigor** and student **support** in an upper division course
- **supporting** student learning through how assignments are presented
