

# CORPORATE CONNECTIONS

STEMblazers inspires girls to visualize themselves in Science, Technology, Engineering and Math (STEM). We envision a world where women are equally represented in the STEM workforce.

# HOW WE SERVE: Organizations Highlights

## **We work with Colorado schools to establish club chapters.**

Teachers reach out to us to partner and enrich the limited STEM experiences provided for girls within their schools.

## **We organize and provide hands-on activities and field trips.**

At each chapter, STEMblazers invites guest speakers and facilitates interactive discussions with STEM focused professionals covering the entire STEM spectrum. Hands on activities are paired with each guest speaker to make a career connection.

## **We work with girls on their essential skills and provide leadership opportunities.**

Through our activities, girls learn about the importance of interpersonal skills such as body language, confidence, communication, peer leadership, teamwork and problem solving.

## **At the high school level we provide job shadowing & mentorship opportunities, networking and public speaking experiences.**

Young women can choose to engage in a deeper dive experience through a job shadow with a STEM professional. We also provide student connections to mentors and encourage participation as public speakers.

## **Support beyond high school.**

Alumni receive additional opportunities to find internships and build their resume as they rise into their careers.
