

Department of Chemistry

Research Group Agreement

Both student and advisor should sign this form to indicate agreement that the student will be joining a particular research group. If, for any reason a student changes research groups, a new form must be signed by all parties, including the previous advisor and the new advisor. Signatures from at least three research faculty indicating that you have met with them and/or the group are required. In order to allow enough time for students and faculty to carefully consider decisions, we ask that students do not officially join a research group until after Thanksgiving. Please turn the signed form in to the Graduate Office.
