

TUTOR LIST

Department of Chemistry | Fall 2026

The following CU Boulder students are offering private tutoring services for chemistry courses. Contact tutors directly to ask about current availability, format, and fees.

IMPORTANT: A teaching assistant may not tutor for money in any course in which they currently serve as a TA, regardless of whether the student is enrolled in the TA's section or not.

Before hiring a tutor

A tutor's role is to help you understand concepts, strengthen problem-solving methods, and apply your understanding to chemical problems. To make good use of paid tutoring time, review the course material, attempt assigned problems, and prepare specific questions before the session. Tutors do not know what will appear on an exam, cannot guarantee a grade, and are students whose own academic commitments may limit their availability.
