

# *ROME LAB: The Nature of Evidence at a Roman Funeral*

DR CHRIS JOHANSON

DEPARTMENT OF CLASSICS, UCLA

*This presentation examines the ways that the Roman funeral eulogy subverts traditionally understood priorities for Latin oratorical argumentation. Through a combination of close and distant reading, Dr. Johanson explores nearly every funeral attested during the Roman Republic. The goal is twofold: 1) to reveal the primacy of visual and visible evidence; and 2) to posit a new model for interpreting funerary performance in the Roman Forum.*

*The presentation will showcase a suite of projects developed in a technology ecosystem that comprises a Unity3D + Drupal presentation layer, a multi-player avatar system, ESRI ArcMap and CityEngine, an application of Linked Open Data, SketchUp, and Wordpress.*

**MONDAY NOVEMBER 5, 2018, 5:30 PM**

**EATON HUMANITIES 250**

*Sponsored by the Graduate Committee on the Arts & the Humanities, the Center for Western Civilization, Thought & Policy, and the Departments of Classics and History.*
