Due to the combination of device firmware and software applications installed, there is a p not perform correctly. For more information, please contact your local authorized dealer.				

• In your Download folder you will find the newly downloaded .dmg file. Click on it.

- On your Desktop you will find the now-opened Disk Image (it looks like a white hard drive icon). Open it.
- Open the A4 folder within it
- Double click the .pkg file. This will begin the Konica Minolta driver installer.

- You will need to authenticate your credentials to your Mac (these are your local computer credentials. What you would use to install programs on your Mac) to complete the install.
- Once completed you'll see the Installation was Successful window. Click Close.

- Now we'll need to add the printer to your Mac. Go to System Preferences at the very upper left (should be below the Apple icon).
- Select the Printers and Scanners option

- Click the lock on the bottom left to give permission to Add A Printer
- Click the plus sign above it to begin your printer add
- Click the IP option at the top of the Add window
- In the address field type: 128.138.144.34 and make sure the Internet Printing Protocol option is selected
- Name the printer "Armory Color Copier"
- Change the Generic Postscript Printer option to 'Select Software'
- Locate and select the KONICA MINOLTA 458e PS driver and hit OK
