

CU BOULDER **CARBON OFFSETS** **FOR HOUSING GUESTS AND CONFERENCE ATTENDEES**

CU Conference Services is dedicated to hosting eco-friendly events and offers the option to purchase carbon offsets during registration for housing guests and conference attendees.

By purchasing a carbon offset, you're supporting projects that help reduce or capture greenhouse gas emissions, balancing out the environmental footprint of your travel to and from Boulder. You can buy carbon offsets for \$12 per metric ton, calculated based on your estimated round-trip flight distance to the Denver area.

REFERENCE FOR AVERAGE CARBON EMISSIONS BY REGION OF TRAVEL:

- » Continental U.S. travel: 1 metric ton
- » North American travel outside U.S.: 1-2 metric tons
- » Travel from South America and Europe: 3-6 metric tons
- » Travel from Asia or Africa: 6-8 metric tons
- » Travel from Southeastern Asia and Oceania: 8+ metric tons

The purchase of carbon offsets will go directly to one of the following projects through [Good Traveler](#).
