CU Conference Services thanks all our campus partners! The metrics we have shared in this report show that CUCS is providing quality services and accommodations to both our internal and external guests at staggering numbers. CUCS, coming off a record breaking 2018, anticipated a slight downward direction of certain trends. However, CUCS is especially optimistic that average attendee bed nights continue to rise. Average bed nights are a true measure of sustainable growth, as the longer our guests stay on campus, the more time they have to experience all our campus and community has to offer.

CUCS looks towards a promising 2020!

Dan Dykstra, CUCS Director
