Additional Policies for CU Boulder Degrees Hosted on Coursera ................................................................ 22
Welcome

Welcome to the University of Colorado (CU) Boulder's Master of Science in Computer Science (MS-CS) on Coursera. Our cutting-edge program is designed for the 21st century learner on the Coursera learning platform and prepares engineers, applied scientists, and technical professionals for career advancement in advanced technical and technical leadership roles. The fully online MS-CS on Coursera presents three major innovations for students:

- **Access.** The program is designed to provide global access to graduate-level education and uses *performance-based admissions* rather than traditional admissions standards. Anyone who can complete graduate-level computer science coursework is eligible to enroll in the MS-CS degree program.

- **Curriculum.** The degree curriculum is modular and self-directed. Our computer science professors have split semester-long courses into single, one-credit courses. These courses naturally fit together in a sequence, but we encourage students to construct their degree plan as needed. Note the degree requires students to complete at least nine full specializations: five full breadth specializations and four or more full elective specializations.

The MS-CS core curriculum addresses a range of areas including theory, software, systems, machine learning, and ethics, including 15 core credits and 15 elective credits.

- **Learning.** The program is guided by the belief that learning belongs to the learner. To be successful, each student must commit to their learning by creating a clear plan of courses, a schedule for study, and a strategy for taking courses.

We recommend students explore MS-CS courses in the non-credit format prior to taking them for credit. This allows students to determine if the course’s content and the instructor’s teaching style fits their learning plan. See Courses & Credit Hours for more information on upgrading from the non-credit to the for-credit experience.

CU Boulder stands fully behind the degree. Students taking the MS-CS on Coursera earn the same credentials as students enrolled on campus. There are no designations on official CU transcripts, diplomas, or certificates that this is an online program offered on the Coursera platform.

The program specifics are reviewed on the College of Engineering and Applied Science (CEAS) website. This document provides students with the policies governing the MS-CS degree. CU graduate degree programs are governed by the University’s and Graduate School’s rules, policies, and procedures. The MS-CS on Coursera is also subject to CU Boulder policies governing degrees hosted on Coursera as well as program-specific policies outlined in this student handbook (updated annually).

We welcome student contact.
- Prospective students and students enrolled in non-credit courses may contact us at mscscoursera-info@colorado.edu.
- Students enrolled in for-credit courses may contact their Course Facilitators or the MS-CS graduate advisor at mscs-coursera@colorado.edu with questions.
We are proud for you to join our community and forge a new kind of education for the 21st century. Welcome to CU Boulder's Master of Science in Computer Science program on Coursera.

**Admissions**

There is no traditional application for admission for these programs. Students do not need to take the Graduate Record Examination (GRE) or English proficiency exams like the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). They never need to submit letters of recommendation or application essays. Neither a prior degree nor university transcripts are required for admission. Because these are purely online programs, students do not need to complete a background check to enroll.

The MS-CS on Coursera program uses *performance-based admissions* for enrollment, which means students earn program admission simply by performing well in a three-course "pathway specialization." Specifically, a student pursuing admission to the MS-CS degree program must complete the following four steps:

1. Earn at least a grade of B in each for-credit course within one of the following pathway specializations:
   - **Graduate Algorithms – Pathway Specialization** (3 credits)
     - CSCA 5414 Dynamic Programming, Greedy Algorithms
     - CSCA 5424 Approximation Algorithms and Linear Programming
     - CSCA 5454 Advanced Data Structures, RSA, and Quantum Algorithms
   - **Software Architecture for Big Data – Pathway Specialization** (3 credits)
     - CSCA 5008 Fundamentals of Software Architecture for Big Data
     - CSCA 5018 Software Architecture Patterns for Big Data
     - CSCA 5028 Applications of Software Architecture for Big Data

2. Achieve a computed pathway specialization grade point average (GPA) of at least 3.00.
3. Have a cumulative GPA of at least 3.00 for all for-credit courses taken to date.
4. Declare their intent to seek the degree via the Enrollment Form, which they can do while enrolling in any for-credit course during any enrollment period. This can be before, during, or after starting work in a pathway specialization.

Upon completion of these four steps, the student is admitted to the MS-CS on Coursera degree program. Students may successfully complete a designated pathway specialization and declare their intent to see the degree at any point in their academic journey. Completion of a pathway specialization is not required for students to begin earning academic credit, only to earn the degree. Pathway courses are a required part of the curriculum, allowing students to make direct progress toward the degree while working toward program admission. To remain in good standing in the program, students must earn a cumulative GPA of 3.00 or higher.

Non-degree-seeking students may also enroll in for-credit courses. All courses attempted and/or completed for credit will appear on official CU Boulder transcripts (unless dropped by the drop deadline) and will count toward the cumulative GPA.
Curriculum & Requirements

Graduate Certificates

A graduate certificate is a sequence of courses totaling 9-12 credit hours that has been approved by the Graduate School at CU Boulder. Students may enroll in graduate certificates as either non-degree-seeking or degree-seeking students.

MS-CS on Coursera students may currently pursue graduate CU certificates on Coursera offered by the Master of Engineering in Engineering Management (ME-EM) on Coursera, the Master of Science in Data Science (MS-DS) on Coursera, and the Master of Science in Electrical Engineering (MS-EE) on Coursera programs.

CU certificates on Coursera are stackable, meaning degree-seeking students can count credits first earned as part of a CU certificate toward the 30-credit MS-CS degree, as well.

All CU certificates on Coursera require students to earn a cumulative certificate GPA of 3.00 or higher before conferral. Individual certificates may have additional requirements.

You must officially declare your intent to pursue any certificate offered by another CU degree on Coursera before graduation and within two years of completing all requirements for that certificate; you may do this by enrolling in at least one course via the enrollment form for that certificate’s home program. For example, to earn the Data Science Graduate Certificate offered by the MS-DS on Coursera program, you must enroll in at least one course via the MS-DS enrollment form.

It is your responsibility to ensure you take courses in the correct order to earn the certificates you are most interested in. Multiple certificates may require the same courses, and you cannot double count courses between multiple certificates. CU certificates on Coursera are automatically conferred once all requirements are met. After graduation, credit that has been applied toward the degree cannot be applied toward additional certificates.

Graduate certificate credentials are conferred by the CU Boulder campus.

Master’s Degree

Degree Requirements

Degree requirements in effect per the Special Programs section of the University Catalog at the time of your admission to the MS-CS on Coursera degree program will apply to you during your course of study. Any revisions to the requirements after the term that you are officially admitted to the MS-CS on Coursera will not apply to you retroactively. Use the University Catalog for the term you were admitted to the program until you graduate, as that governs your graduation requirements.
The MS-CS on Coursera is a non-thesis degree program that requires 30 credit hours of degree-eligible graduate-level coursework. This includes 15 credits of breadth coursework and a choice of 15 credit hours of elective coursework from the options listed below. Students must complete five elective specializations or a combination of four full elective specializations and three 1-credit elective courses totaling 15 credits.

Before the MS-CS degree is awarded, students must have a minimum cumulative GPA of 3.00 and a grade of B or better in each breadth class (including the two required pathway specializations and the three additional required breadth specializations). Elective courses in which grades below C (2.0) are received may not be applied toward degree requirements.

Courses may not be double counted toward two credentials of the same level. This means students can apply credit from a particular course toward one graduate certificate and one graduate degree, but they cannot apply credit from a particular course toward two graduate certificates or two graduate degrees. CU degrees and certificates on Coursera are automatically conferred once all requirements are met.

**Breadth Courses (15 credits)**

Students must complete five specializations for a total of 15 breadth credits:

**Pathway Specialization: Graduate Algorithms (3 credits)**
- CSCA 5414 Dynamic Programming, Greedy Algorithms – Same as DTSA 5503
- CSCA 5424 Approximation Algorithms and Linear Programming
- CSCA 5454 Advanced Data Structures, RSA, and Quantum Algorithms

**Pathway Specialization: Software Architecture Patterns for Big Data (3 credits)**
- CSCA 5008 Fundamentals of Software Architecture for Big Data – Same as DTSA 5507
- CSCA 5018 Software Architecture Patterns for Big Data – Same as DTSA 5508
- CSCA 5028 Applications of Software Architecture for Big Data – Same as DTSA 5714

**Machine Learning: Theory and Hands-on Practice with Python (3 credits)**
- CSCA 5622 Introduction to Machine Learning: Supervised Learning – Same as DTSA 5509
- CSCA 5632 Unsupervised Algorithms in Machine Learning – Same as DTSA 5510
- CSCA 5642 Introduction to Deep Learning – Same as DTSA 5511

**Computing, Ethics, and Society (3 credits)**
- CSCA 5214 Computing, Ethics, and Society: Foundations
- CSCA 5224 Algorithmic Bias and Professional Ethics
- CSCA 5234 Computing, Ethics, and Society: Applications

**Network Systems (3 credits)**
- Network Systems 1 (course number & name TBD)
- Network Systems 2 (course number & name TBD)
- Network Systems 3 (course number & name TBD)

 Indicates a cross-listed course offered under two or more programs (e.g., Dynamic Programming, Greedy Algorithms is offered as both CSCA 5414 and DTSA 5503). You may not earn credit for more than one version of a cross-listed course.
Elective Courses (15 credits)

Students must earn a total of 15 elective credits by completing either (a) all courses within five specializations, or (b) all courses within four specializations and three 1-credit courses from any combination of specializations.

Data Mining Foundations and Practice (3 credits)
- CSCA 5502 Data Mining Pipeline – Same as DTSA 5504
- CSCA 5512 Data Mining Methods – Same as DTSA 5505
- CSCA 5522 Data Mining Project – Same as DTSA 5506

Natural Language Processing: Deep Learning Meets Linguistics (3 credits)
- CSCA 5832 Fundamentals of Natural Language Processing
- CSCA 5842 Deep Learning for Natural Language Processing
- CSCA 5852 Model & Error Analysis for Natural Language Processing

Introduction to Human-Computer Interaction (3 credits)
- CSCA 5859 Ideating and Prototyping Interfaces
- CSCA 5869 User Interface Testing and Usability
- CSCA 5879 Emerging Topics in HCI: Designing for VR, AR, AI

Foundations of Autonomous Systems (3 credits)
- CSCA 5834 Modeling of Autonomous Systems
- CSCA 5844 Requirement Specifications for Autonomous Systems
- CSCA 5854 Verification and Synthesis of Autonomous Systems

Object-Oriented Analysis & Design (3 credits)
- CSCA 5428 Object-Oriented Analysis & Design 1 (course name TBD)
- CSCA 5438 Object-Oriented Analysis & Design 2 (course name TBD)
- CSCA 5448 Object-Oriented Analysis & Design 3 (course name TBD)

Robotics (3 credits)
- CSCA 5312 Robotics 1 (course name TBD)
- CSCA 5332 Robotics 2 (course name TBD)
- CSCA 5342 Robotics 3 (course name TBD)

Fundamentals of Data Visualization (1 credit)
- CSCA 5702 Fundamentals of Data Visualization – Same as DTSA 5304

Deep Learning Applications for Computer Vision (1 credits)
- CSCA 5812 Deep Learning Applications for Computer Vision – Same as DTSA 5707

\[\text{** Indicates a cross-listed course offered under two or more programs (e.g., Dynamic Programming, Greedy Algorithms is offered as both CSCA 5414 and DTSA 5503). You may not earn credit for more than one version of a cross-listed course.}\]
The Department of Computer Science will continue to roll out additional program curriculum. Currently, the department is developing courses covering topics such as, theory of computation, network systems, and big data challenges and NoSQL solutions.

Students should be aware that minor changes to course titles may occur in the first year of the program.

**Other Elective Courses**

Up to six graduate-level credit hours of courses offered by other CU degrees on Coursera may be applied as elective credits toward the MS-CS on Coursera degree. All courses must be graduate level, offered through Coursera, and meet all applicable academic standards. This includes all courses offered by the ME-EM on Coursera, the MS-DS on Coursera, and the MS-EE on Coursera programs that do not start with a "CSCA" prefix, with the exception of the following courses.

Credit from the following courses *cannot* be applied toward MS-CS on Coursera requirements:

- DTSA 5302 Cybersecurity for Data Science
- DTSA 5303 Ethical Issues in Data Science
- DTSA 5501 Algorithms for Searching, Sorting, and Indexing
- DTSA 5502 Trees and Graphs: Basics

Students wishing to complete degrees in more than one program must complete all the requirements for both degrees with no shared or overlapping course work.

**Non-Credit and For-Credit Experiences on Coursera**

**Non-Credit & Coursera Completion Certificates**

All MS-CS on Coursera courses are hosted on the Coursera platform. A typical non-credit course includes content, discussion forums, and homework assignments of level and scope similar to assignments made in an equivalent on-campus course in the same subject. Many of the courses are organized into sequences called *specializations*, a series of courses linked together to cover a topic more fully. Non-credit students may use specializations to earn course and specialization completion certificates from Coursera, but non-credit courses and specializations do not carry CU Boulder credit and are not recorded on CU Boulder transcripts.

A student enrolled in a non-credit version of an MS-CS on Coursera course may elect to pay tuition and upgrade to the for-credit version of the course at any time in their learner journey. However, MS-CS credits are only applicable to the MS-CS degree for up to eight years; after that point, students must re-enroll and pay tuition for any expired credits that are required for graduation. (See Time Limit for details.)

Work performed in the non-credit portion of the course (e.g., assignments and quizzes) automatically transfers with the student to the for-credit option, and the student can then continue to complete any remaining homework, exams, projects, and lessons. Due to their interactive nature, discussion board posts and peer-graded assignments may not transfer from session to session if you drop/withdraw and later re-enroll in a particular class. Be sure to save your work outside of the Coursera platform.
Students may upgrade from non-credit to for-credit at any time during the enrollment window via the enrollment form. Each enrollment period begins two weeks before the first day of class and ends two weeks before all coursework is due. In addition, please note the following:

1. All for-credit coursework is due by the last day of the session.
2. Previously completed assignments will be automatically applied to your for-credit experience.
3. Prior to accessing for-credit content for the first time, you must activate/link your student accounts and pass a short (4–5 hour) non-credit onboarding course. You only need to complete these steps once.
4. Please note that if you start a non-credit course within the same month that you upgrade to the for-credit version, you will not receive a refund for the monthly subscription associated with the non-credit course. The monthly subscription fee is paid to Coursera, not to the University of Colorado Boulder.

For-Credit & CU Boulder Credentials

A course is not considered credit-bearing until a student enrolls in the for-credit session of the course by paying CU Boulder tuition. Enrolling in the for-credit session enables access to additional credit-bearing content and assessments.

For-credit CU Boulder courses on Coursera may include proctored assessments or use project-based assignments.

Individuals may take for-credit CU Boulder courses on Coursera as either non-degree-seeking students (in which case they do not seek admission to the MS-CS on Coursera degree program) or as degree-seeking students (in which case they have followed the steps above to enroll in the MS-CS on Coursera degree program).

Prerequisites & Assumed Background Knowledge

There are no course prerequisites or corequisites for MS-CS courses on Coursera. Nevertheless, it is important that students are prepared for individual courses. Course descriptions will advise students of assumed incoming knowledge, and students are strongly encouraged to take course sequences in the order they are presented on the Coursera platform. Students are also encouraged to take a non-credit version in some form before moving to the for-credit version to determine whether they can succeed, especially if they are unsure whether they have the background knowledge required for a course.

Courses & Credit Hours

Each MS-CS course on Coursera with a "CSCA" prefix is worth one credit hour. Elective courses offered by other CU degrees on Coursera like the ME-EM on Coursera, the MS-DS on Coursera, and the MS-EE on Coursera programs may offer different credit hour amounts. It is your responsibility to track your progress and ensure you meet all graduation requirements.
Individual courses in the program have an anticipated completion timeline of between four and six weeks. The program’s credit hour system reflects its commitment to maintaining the rigor of the on-campus experience in an online setting by narrowing and focusing the content on a specific topic.

**Financial Information**

**Tuition**

Tuition is assessed at a linear rate based on credit hours and may vary by program. Please refer to the Bursar Office’s website for officially published tuition rates. Students are granted access to for-credit components of a course after their tuition has been paid and verified.

For accepted payment methods, please refer to the Bursar's Degrees on Coursera.

Tuition payments cannot be rolled over to future sessions.

If a tuition payment does not process successfully and/or students have a past due balance, a financial hold is placed on the student’s account and the student will be prevented from registering for future courses at CU Boulder until the past due amount is paid in full. Former or current CU Boulder students wishing to enroll in MS-CS on Coursera courses who have unpaid debts may have these debts deducted from payments made to the MS-CS on Coursera program and before MS-CS on Coursera tuition charges are paid. If applicable, the students may be dropped from enrolled classes for non-payments or invalid payments. The Bursar’s Office will collect on the unpaid balance according to the Bursar’s Office collection policies.

If a student enrolled in the MS-CS on Coursera program wishes to take additional courses on Main Campus or through Continuing Education, they must enroll through the appropriate channels and will be charged separately for those courses. Students will also be required to pay the required mandatory fees associated with their new enrollment.

The CU Employee Tuition Assistance Benefit cannot be applied towards the MS-CS on Coursera program.

MS-CS on Coursera courses are not eligible for coverage by RA/TA waivers.

Courses taken in B3 programs are eligible for 3rd party sponsorship. The students are required to make a payment at the time of enrollment request. The students will receive a refund once the University receives the sponsorship authorization, and the sponsorship applies to the student accounts.

The tuition dispute is available for the students in B3 programs, refer to the Bursar’s Office website tuition dispute process. The non-attendance cannot be used as a reason for tuition dispute for B3 programs.
Student Fees

Currently, there are no student fees charged to students in the MS-CS on Coursera program. Course tuition also includes access to CU on Coursera, Digital Library resources, the Handshake online employment platform and networking tool, the VMock online resume review service, and the Forever Buffs alumni association.

Other Fees

Students who enroll in for-credit MS-CS on Coursera courses and pay tuition do not need to pay for a Coursera subscription. Currently, students do not need to pay for exam proctoring costs. Students may be charged on an at-cost basis for such items as credit card fees.

Financial Aid

At this time, no financial aid will be administered for the MS-CS on Coursera program.

Calendar & Course Sessions

Non-credit course sessions are typically self-paced with assignment due dates programmed and updated by the Coursera platform.

For-credit sessions run in 8-week increments throughout the calendar year. Students have the ability to upgrade a course to the for-credit experience, complete all additional for-credit coursework, and earn credit and a grade in a fashion approximating an on-demand service.

Students enrolled in a for-credit session will be expected to complete and submit work by the 8-week session end date. At the end of a for-credit session, the session closes; and all enrolled students are assigned a letter grade.

We look forward to each student succeeding in this program. To that end, we recommend students take a lighter course load for their first 8-week session—enrolling in only one or two courses. By doing so, students can best determine time commitment and workload. This allows students to get a better idea of how to plan for future sessions.

Students who want to complete the degree in two years must take 2–3 courses per 8-week session.

Calendar for Proctored Exams and Projects

MS-CS courses on Coursera may use ProctorU to proctor tests and exams. Students in MS-CS courses must complete final exams and projects that use the ProctorU remote proctoring service in each session starting at 9:00 am Mountain Time on the day classes begin and ending at 4:50 pm Mountain Time on the day classes end.
You must schedule your proctored experience at least 72 hours in advance of your desired day and time. For example, if the ProctorU availability window closes at 4:50 pm on a Friday, the last time you could schedule a proctored exam or project would be at 4:50 pm that Tuesday.

To secure your desired proctoring session time, log into ProctorU to schedule your session as soon as you know your desired session date and time.

View the calendar for each session to see deadlines for scheduling and completing proctored exams and projects.

**Transfer of Credit**

Due to the innovative nature of this program, credit earned at other institutions or in other programs at the University of Colorado Boulder are not transferable at this time to the MS-CS on Coursera.

Other institutions may accept transfer credit from the MS-CS on Coursera at their discretion based upon their transfer of credit standards.

**Academic Records & Policies for For-Credit Courses**

**Course Repetition & Grade Replacement**

The cumulative GPA and credit totals are based on all courses attempted.

MS-CS on Coursera students may repeat as many different courses as they like. The [Grade Replacement Policy](#) allows students in eligible courses with qualifying grades, to repeat courses and replace credits in the cumulative GPA calculation. In this process, all courses attempted will still appear on the transcript.

To be eligible for grade replacement, you must:
- Have previously taken an eligible MS-CS on Coursera course for credit and earned a C+ or lower.
- Have no record of academic dishonesty for the course in question.
- Still be working toward graduation. Graduates are not eligible for grade replacement for courses taken prior to earning their degree.
- Note that grades for CSCA 7000 may be eligible for grade replacement only if you retake the course under an updated (permanent) catalog number and contact [reg-specialprograms@colorado.edu](mailto:reg-specialprograms@colorado.edu) to request that the Office of the Registrar and the Department of Computer Science review your eligibility.
- See the [Grade Replacement Policy](#) for more details.
Course Drops, Tuition Refunds, Withdrawals & Grades

Because the MS-CS on Coursera has flexible course start dates, all drops, tuition refunds, withdrawals and grades are handled at the individual course level. It is the student’s responsibility to monitor these deadlines. Coursera and CU Boulder are not responsible for notifying the students of these deadlines. To drop or withdraw from a course, students must complete the appropriate form on the CU Boulder Registrar's Special Programs page.

Course Drop & Refund

To drop a class and receive a full refund, two requirements must be met:

1. The student must submit a drop request within 14 days of the class start date or their enrollment date, whichever is later, and
2. The student must not have accessed restricted content (e.g., password quiz, honor code verification, final assessment such as final exam/project, etc.) in the course or received a course grade. See Grades if restricted content has been accessed.

When a course is dropped under these conditions, it will not appear on the student’s record. All refunds are returned to the payment method on file within 10 business days.

The following examples help to illustrate the timeline for students to drop and receive a refund:

- **Enrolled Before Class Start**: A student enrolls in a class before it begins. Class starts on the 1st of the month. The deadline for the student to drop this class and receive a refund is 11:59 pm Mountain Time on the 14th of that same month.
- **Enrolled After Class Start**: A student enrolls in a class after it begins. Class starts on the 1st of the month, but the student enrolls on the 10th of the month. The deadline for this student to drop the class and receive a refund is 11:59 pm MT on the 23rd of that same month.

If a student enrolls in a course and does not complete the course, tuition payments cannot be rolled over to future sessions.

Course Withdrawal

Students who request to withdraw from the course after the 14-day period and who have not accessed the restricted content (e.g., password quiz, honor code verification, final assessment such as final exam/project, etc.) may withdraw from the course until the session end date, prior to 17:00 hours (5:00 pm Colorado Mountain Time). When a student withdraws from a course under these conditions, they are not eligible for a refund and will receive a grade of W on their academic record. W grades have no bearing on GPA and credit total.

Neither Coursera, nor the University of Colorado, nor the Computer Science program at CU Boulder is responsible for students who delay too long and experience technical or other difficulties; it is the student’s responsibility to act responsibly and promptly when making these kinds of decisions.
As noted under Tuition, if a tuition payment does not process successfully, a financial hold is placed on the student’s account and the student will be prevented from registering for future courses at CU Boulder until the outstanding amount is paid in full.

See Program Withdrawal for more information about withdrawing from the MS-CS on Coursera program.

Grades

Students who access restricted content (e.g., password quiz, honor code verification, final assessment such as final exam/project, etc.) are ineligible for a drop, withdrawal, or refund, and are assigned a final grade.

Upon completion of all required coursework and within a couple of weeks following the session end date, a letter grade is recorded on the student’s CU Boulder transcript.

Students who complete some but not all coursework and who specifically do not complete the password quiz to unlock the final exam (or equivalent, like an honor code verification) will be assigned administrative Ws after the session end date passes.

Grades of Incomplete (I) are not assigned as part of the program, and a Pass-Fail (P/F) grading basis is not offered.

Academic Standing, Time Limit, Discontinuance & Withdrawal

Academic Standing

Degree-seeking students admitted to the MS-CS on Coursera are expected to maintain a cumulative GPA of 3.00 or higher for good academic standing in the program and to earn the degree.

If a student’s cumulative GPA falls below 3.00, the student is considered in academic warning. The student will remain in academic warning until the cumulative GPA is raised to 3.00, at which point the student is returned to good academic standing.

If a student’s cumulative GPA falls below 2.50, they will be academically dismissed from the degree program. Such students may continue to take for-credit courses as non-degree-seeking and may be able to earn a certificate but cannot earn a degree. To be reinstated to the degree program after dismissal, the student must raise their cumulative GPA to 3.00 and complete the other requirements for admission, including the successful completion of a new pathway specialization.

The MS-CS degree cannot be awarded until the minimum 3.00 cumulative GPA has been achieved.
Time Limit

Courses used toward the MS-CS on Coursera degree must have been completed within 8 years of the degree conferral date. Courses taken more than 8 years prior to graduation will appear on the transcript and be calculated in the cumulative GPA but may not be used toward the degree. Students may continue to pursue the degree even after eight years, but they must accrue 30 credits within an 8-year window in order to earn the degree.

The 8-year restriction is applied to courses on a rolling basis and is determined by the date that credit was awarded in the course.

Discontinuance

Students admitted to the MS-CS on Coursera degree program are not otherwise required to take a minimum number of credit hours over any given period of time and are not required to apply for a leave of absence when not enrolled in courses. However, students admitted to the degree program who have not enrolled for two years will be discontinued until they enroll in a new for-credit course. At that point, the student will automatically be reinstated.

Program Withdrawal

Students admitted to the MS-CS on Coursera program may formally withdraw from the program by contacting the academic program advisor who will, in turn, notify the Office of the Registrar to discontinue the student.

Non-degree seeking and certificate students (not admitted to the degree program) may simply stop enrolling in future courses. No withdrawal formalities of any sort are necessary.

See Course Withdrawal for more information about withdrawing from individual courses.

Privacy Policy

This program adheres to the University of Colorado Boulder’s commitment to the protection of individual privacy. See the CU Boulder Privacy Statement for details.

In order to preserve the integrity of this program, some exams and projects will have live proctoring managed by ProctorU. Read the ProctorU Privacy Policy for details.

Program Faculty, Course Facilitators, Degree Governance & Student Support

Program Faculty

All courses and specializations affiliated with the MS-CS are designed and taught by instructors with Graduate School faculty status.
Course Facilitators

Course facilitators—typically graduate students knowledgeable in the subject matter—will assist in administering courses. Course facilitators participate in the course discussion forums, respond to student feedback, address issues with the course and its features on the platform, and convey any relevant issues to the instructor of record and relevant program administrators.

Degree Program Governance

The MS-CS on Coursera is governed by the Computer Science Graduate Committee. The Computer Science Graduate Committee is charged with overseeing the strategic direction of the degree, as well as reviewing its program-specific processes and policies annually.

Student Services Provided to Enrollees in the Program

Academic Support

A student’s primary academic support will be via peer mentorship and course facilitators.

Graduate Advising for the Program

Students enrolled in for-credit courses may contact the MS-CS on Coursera graduate advisor at mscs-coursera@colorado.edu.

Career Services & Alumni Association

Students who are admitted into the degree will receive lifelong access to Handshake and other selected services and resources via CU Boulder Career Services and the Forever Buffs alumni network.

Diplomas

Degrees are conferred three times annually. Check the graduation calendar for semester-specific dates. Diplomas are issued to graduating students in both paper and digital formats. See Order a Diploma or Certificate.

Certificates

Certificates are automatically awarded and transcribed on the student’s transcripts after the certificate requirements are met. Certificates are issued in both paper and digital formats. See Order a Diploma or Certificate.

Commencement

Students who graduate from the program and earn the MS-CS on Coursera degree are welcome to attend on-campus graduation ceremonies but are not obligated to do so.

Academic Dishonesty & Honor Code

The University of Colorado Boulder takes issues of academic dishonesty extremely seriously.
Students in all of CU Boulder’s courses, whether non-credit or for-credit, are expected to perform to the highest standards of academic honesty.

Students enrolled in for-credit courses are members of the CU Boulder community and are subject to the Honor Code Office’s policies and procedures.

Any suspected violations of the Honor Code, including reports of violation from the Program’s proctoring service, will be submitted to the CU Boulder Honor Code Office (honor@colorado.edu).

Students who violate the Honor Code are subject to discipline, including possible academic penalties and non-academic sanctions. The course instructor will assign relevant academic sanctions for students found to have violated University rules on Academic Dishonesty, if applicable.

Find more details on the Honor Code at the Honor Code Office website and in the CU Boulder policies governing degrees hosted on Coursera.

**Petition, Appeal & Grievance Issues**

Petitions, appeals, connectivity issues and grievances should be handled at the lowest level possible, within the individual course if appropriate. This policy applies to platform issues as well as discussion forum, course content, assessment, and degree issues.

Concerns regarding platform issues should be directed to Coursera’s technical support team at mscs-coursera@colorado.edu.

Learning management system issues (i.e., CU Boulder software as distinct from Coursera software) should be directed to the CU Boulder Office of Information Technology (oithelp@colorado.edu). This includes issues with Canvas LMS, the platform where all CU Boulder students must complete a non-credit Mandatory Community Equity Training course after program admission. See the Current Students page of the CEAS website for course details.

Concerns regarding discussion forum, content, assessment, and degree issues should be brought directly to the individual course’s course facilitator. If the course facilitator cannot resolve the issue, they will escalate the issue through the following resolution hierarchy:

1. Course Facilitator
2. Course Coordinator
3. Instructor of Record
4. Faculty Director
5. Computer Science Graduate Committee
6. Department Chair

Concerns regarding the degree itself, and not having to do with a particular course, follow a different pathway. These should begin with the Graduate Advisor and then move accordingly:

1. Graduate Advisor
2. Faculty Director
In all cases, the program policy is to resolve student concerns at the lowest level possible, without escalation.

**Connectivity Issues**

Students are responsible for ensuring that they have a stable exam environment when taking proctored assessments. Coursera and CU Boulder are not responsible for internet connectivity issues.

**Grade Appeals**

The instructor of record has primary authority and responsibility in all aspects of evaluating student course performance and assigning grades.

If a student believes that a course grade is incorrect, the student should first contact the course facilitator or instructor of record. Failing resolution at this level, the student may make a formal, written grade appeal to the program faculty director.

The written grade appeal must document the basis for the appeal and should state the specific remedy desired by the student. The appeal should include the following:

1. The student’s full name, email, phone number, and date
2. The course title, course number, section, instructor full name, and session start and end dates
3. The details of the case, including the steps taken to resolve and, if a specific test or homework is concerned, the nature of the problem
4. The student’s desired outcome

The appeal must be submitted within 30 days of the conclusion of the course to mscs-coursera@colorado.edu. The instructor of record will be given an opportunity to respond in writing to the faculty director regarding the student’s appeal.

The faculty director will respond within 30 days that either (1) the original grade stands, or (2) that a revised grade be assigned. The faculty director will submit a short written statement summarizing the reasons for the decision. The director will submit an official change of grade request if a grade change is justified.

In cases where the instructor or student do not agree with the director's decision, the faculty director shall submit all materials to the Dean of the college (or a designee) where the course is rostered who will make a final decision on the student’s grade appeal. In the case of an interdisciplinary course not rostered within a home department or college, materials shall be submitted to the Dean of the Graduate School. There is no further appeal beyond this.
Grievances

Programs follow the Graduate School policy for grievances. The first step in the Grievance Process and Procedure requires a student to first file a grievance through the program, and then file an appeal to the Graduate School if the issue is not resolved through the program-level process. The program-level grievance shall be initiated by submitting the Graduate Student Grievance form to the faculty director. The grievance must be reviewed by an ad-hoc faculty committee or steering committee before an appeal can be filed directly to the Graduate School. Additionally, the University of Colorado Boulder has a guide for information related to appeals, complaints, and grievances, including those for distance and online students.

Students located outside of Colorado must first seek resolution with the University of Colorado Boulder by filing a complaint with the appropriate person or office. If the student bringing the complaint is not satisfied with the outcome of the university’s internal processes, the student may file a complaint with the university’s SARA Portal Entity at the Colorado Department of Higher Education.

The University of Colorado Boulder also provides access to a list of all state contacts for filing complaints should the person wish to pursue these venues.

Regardless of location, if students are unsatisfied with the resolution and all other avenues provided have been exhausted, unresolved complaints may be filed with the Higher Learning Commission, the University’s regional accreditor.

Accommodations for Disabilities

If you qualify for accommodations because of a disability, please submit your accommodation letter from Disability Services to your faculty member in a timely manner so that your needs can be addressed. Disability Services determines accommodations based on documented disabilities in the academic environment. Information on requesting accommodations is located on the Disability Services website. Contact Disability Services at 303-492-8671 or dsinfo@colorado.edu for further assistance. If you have a temporary medical condition, see Temporary Medical Conditions on the Disability Services website.

Sexual Misconduct, Discrimination, Harassment and/or Related Retaliation

CU Boulder is committed to fostering an inclusive and welcoming learning, working, and living environment. University policy prohibits sexual misconduct (harassment, exploitation, and assault), intimate partner violence (dating or domestic violence), stalking, protected-class discrimination and harassment, and related retaliation by or against members of our community.
These behaviors harm individuals and our community. The Office of Institutional Equity and Compliance (OIEC) addresses these policies, and individuals who believe they have been subjected to misconduct can contact OIEC at 303-492-2127 or email cureport@colorado.edu. Information about university policies, reporting options, and support resources can be found on the OIEC website.

Please know that faculty and graduate instructors have a responsibility to inform OIEC when they are made aware of any issues related to these policies regardless of when or where they occurred to ensure that individuals impacted receive information about their rights, support resources, and resolution options. One of the free, confidential resources to help someone explore their options and receive trauma-informed counseling is CU’s Office of Victim Assistance (OVA), 303-492-8855.

To learn more about reporting and support options for a variety of concerns, visit Don’t Ignore It.

**State Authorization Reciprocity Agreements (SARA) & the Higher Education Opportunity Act**

**State Authorization**

The University of Colorado participates in the State Authorization Reciprocity Agreement (SARA) – an agreement among states, territories, and the District of Columbia that establishes a level of quality in distance education and offers consumer protection to students. As a participant in SARA, the University of Colorado Boulder agrees to comply with applicable state and federal regulations in order to offer educational opportunities outside of Colorado.

**International Students**: International Students are advised to understand and be apprised of the norms, rules, regulations, and requirements related to programs offered online in their country of residence, particularly if the country will charge any additional taxes, withholdings, or fees associated with programs offered online.

International students are encouraged to contact the International Student and Scholar Services in the Office of International Education if they have any questions.

**Higher Education Opportunity Act**

The Higher Education Opportunity Act requires institutions of higher education to disclose and make available to current and prospective students safety-related, financial, graduation rate, athletics, and cost information, as well as instructions on how to obtain more information.

Students may review these required disclosures for CU Boulder at the Your Right To Know website.

**Accreditation & Designations**

The University of Colorado Boulder is accredited by the Higher Learning Commission (HLC) and includes programs delivered by correspondence and distance education.
See CU Boulder policies governing degrees hosted on Coursera for HLC and Department of Education definitions of correspondence education, correspondence courses, and distance education.

Please note programs offered by the University of Colorado Boulder that are designated as correspondence education are not eligible for Financial Aid.

**Additional Policies for CU Boulder Degrees Hosted on Coursera**

See CU Boulder policies governing degrees hosted on Coursera for details about additional policies that apply to this program.
