

A DBER Science Education Seminar
Innovation Incubator Faculty Projects

Becca Ciancanelli, Ph.D.

Inclusive Pedagogy Lead, Center for Teaching and Learning
University of Colorado, Boulder

Monday, 20th April 2019 ZOOMED @ 3:30 PM

One year ago, ASSETT decided to add something new to their project portfolio: an Innovation Incubator. The idea is based loosely on start-up incubators. In this effort, they have called together groups of faculty who are interested in the same broad area of teaching with technology. They initially received 47 proposals from 44 teams or individuals across the college. Participants were asked to summarize their big idea in a one-page paper. ASSETT read and synthesized those papers, forming four groups of like-minded scholars. Each group is supported by a member from the ASSETT team. Monday's presentation will include a ten minute presentation from each group, with a focus on mission, goals and hopeful products. Groups may be asking for faculty beta testers in the near future.

Presenters will be Ruth Heisler, June Gruber, Nicole Jobin and Eric Vance.
