

# Get FREE timers to automatically shut down lab equipment

automatically shut down lab equipment

Save energy and minimize your lab's impact on climate change!\*

## Does your lab have any of these?

Temperature-controlled water baths?

Heating blocks?

Or other equipment that can be turned on and off automatically?

Easy-to-use timers are already being used in campus labs with no impact on research or productivity. Two timers in the Batey Lab in Biochemistry are saving enough energy every day to power a large flat screen TV for 6 hours!

(data from California Energy Commission)

We also provide timers for **larger equipment** with the help of an electrician! Contact CU Green Labs below for your FREE timers.

\* Labs consume 5-7 times more energy than campus classroom or office space.
