

# Fume Hood Sharing Saves Energy

Fume hoods are usually the most energy intensive resource in labs.

Sharing minimizes the need for more fume hoods.

The Keck Lab shares its hoods within JILA and is a great example of how hoods can be shared.

For suggestions on effective and safe sharing of fume hoods, reach out to [ehs@colorado.edu](mailto:ehs@colorado.edu) and [kecklab@colorado.edu](mailto:kecklab@colorado.edu)
