

Green Labs Program

UNIVERSITY OF COLORADO **BOULDER**

Students and staff collaborating with research groups and other campus stakeholders to incorporate efficiency and sustainability measures into labs and lab buildings

Green Lab Best Practices

- 13.1 GWh of electricity and 73 million gallons of water saved from 2009-2023 with the use of efficiency measures
- Reduction of hazardous waste with the reuse of 3,400 gallons of solvent

Recycling Program

- Diverted 500,000 lbs of hard-to-recycle materials from landfills
- Including brown glass, block foam, pipette tip boxes, plastic bags and film, metal containers

Promoting Equipment Sharing

- Shared ULT freezers in locations across campus with -70°C space to rent
- Partnering with cores to encourage equipment sharing for inclusive access to research resources, cost savings, and environmental sustainability
