

UNIVERSITY OF COLORADO - DEPARTMENT OF ECONOMICS
ECON 8828 - SEMINAR IN ECONOMETRICS - FALL 2026
PROFESSOR CARLOS BRUNET MARTINS-FILHO

Office. Economics Building 105

Meetings. Tuesdays and Thursdays 2:00 PM - 3:15 PM in ECON 5.

Office hours. Office hours will be held Tuesdays and Thursdays from 5:00 PM - 6:00 PM. If you need an appointment outside these hours send an email to carlos.martins@colorado.edu and I will try to accommodate your request.

Class URL. <http://spot.colorado.edu/~martinsc/8828.html>.

Prerequisites. Successful completion of ECON 7818 and Econ 7828 or consent of instructor.

Objectives. This is one of the Ph.D. field courses in Econometrics. The course objective are:

- provide a rigorous introduction to some non-parametric models for densities, distributions, regressions and associated estimators and inference procedures,
- identify research topics that address gaps or deficiencies in the existing literature.

Grades. Your course grade depends on the quality of a research project and performance on a final examination. The research project is a 10 to 15 page long research proposal. It should include an introduction that convinces the reader of the relevance of the proposed research/contribution, a careful review of the relevant literature, and a preliminary guide to the results you hope to obtain and the methodology to be used. Relevant dates and points are given below.

Evaluation	Points	Date
Research proposal	40	December 1
Final examination	60	December 9, 1:30 PM - 4:00 PM

Support material and reference books.

A set of class notes are available for this course. They will be available as PDFs on the class website. Study them carefully. In addition, the following books have very good presentations of some of the material we will cover.

1. Bosq, D., 1998, Nonparametric Statistics for Stochastic Processes, Springer-Verlag, New York.
2. Fan, J. and I. Gijbels, 1996, Local Polynomial Modeling and its Applications, Chapman and Hall, London.
3. Fan, J. and Q. Yao, 2003, Nonlinear Time Series, Springer Verlag, New York.
4. Li, Q. and J. S. Racine, 2007, Nonparametric Econometrics: Theory and Practice, Princeton University Press, Princeton.
5. Pagan, A. and A. Ullah, 1999, Nonparametric Econometrics, Cambridge University Press, Cambridge.
6. Tsybakov, A., 2009, Introduction to Nonparametric Estimation, Springer, New York.

7. van der Vaart, A., 1998, Asymptotic Statistics, Cambridge University Press, Cambridge.

Topics.

1. Estimation of univariate densities on $\mathbb{R}$
 - (a) Rosenblatt's estimator and its properties for IID processes
 - (b) Bandwidth choice
2. Multivariate density estimation over $\mathbb{R}^D$
 - (a) Rosenblatt's estimator and its properties for IID processes
 - (b) Bandwidth choice
3. Estimation of univariate densities over $[0, \infty)$
 - (a) Hestenes' estimator and its properties for IID processes
 - (b) Bandwidth choice
4. Estimation of univariate distributions
 - (a) The classical kernel estimator and its properties for IID processes
 - (b) Bandwidth choice
 - (c) The case of discontinuous distributions and estimation of their jumps
5. Nonparametric regression
 - (a) Nadaraya-Watson, local-polynomial estimators and their properties for IID processes
6. Additive regression models
 - (a) An introduction and a discussion of identification
 - (b) Backfitting and marginal integration estimation
 - (c) An introduction to splines
 - (d) The spline-backfitted kernel estimator
7. Selected topics in nonparametric regression
 - (a) Partially linear regression models and Robinson's estimator
 - (b) Nonparametric regression estimation with parametric covariance
 - (c) Nonparametric regression with endogenous regressors

Important information.

- Classroom behavior

Both students and faculty are responsible for maintaining an appropriate learning environment in all instructional settings, whether in person, remote or online. Those who fail to adhere to such behavioral standards may be subject to discipline. Professional courtesy and sensitivity are especially important with respect to individuals and topics dealing with race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy. For more information, see the policies at www.colorado.edu/policies/classbehavior.html and at www.colorado.edu/studentaffairs/judicialaffairs/code.html#student_code.

- Accommodation for disabilities

If you qualify for accommodations because of a disability, please submit a letter from Disability Services in a timely manner (for exam accommodations provide your letter at least one week prior to the exam) so that your needs can be addressed. Disability Services determines accommodations based on documented disabilities. Contact Disability Services at 303-492-8671 or by e-mail dsinfo@colorado.edu.

If you have a temporary medical condition or injury, see Temporary Medical Conditions: Injuries, Surgeries, and Illnesses guidelines under Quick Links at Disability Services website and discuss your needs with me.

- Preferred student names and pronouns

CU Boulder recognizes that students' legal information doesn't always align with how they identify. Students may update their preferred names and pronouns via the student portal; those preferred names and pronouns are listed on instructors' class rosters. In the absence of such updates, the name that appears on the class roster is the student's legal name.

- Honor code

All students enrolled in a University of Colorado Boulder course are responsible for knowing and adhering to the Honor Code academic integrity policy. Violations of the Honor Code may include, but are not limited to: plagiarism, cheating, fabrication, lying, bribery, threat, unauthorized access to academic materials, clicker fraud, submitting the same or similar work in more than one course without permission from all course instructors involved, and aiding academic dishonesty. All incidents of academic misconduct will be reported to the Honor Code (honor@colorado.edu; 303-492-5550). Students found responsible for violating the academic integrity policy will be subject to nonacademic sanctions from the Honor Code as well as academic sanctions from the faculty member. Additional information regarding the Honor Code academic integrity policy can be found on the Honor Code website.

- Sexual misconduct, discrimination, harassment and/or related retaliation

CU Boulder is committed to fostering an inclusive and welcoming learning, working, and living environment. The university will not tolerate acts of sexual misconduct (harassment, exploitation, and assault), intimate partner violence (dating or domestic violence), stalking, or protected-class discrimination or harassment by or against members of our community. Individuals who believe they have been subject to misconduct or retaliatory actions for reporting a concern should contact the Office of Institutional Equity and Compliance (OIEC) at 303-492-2127 or email cureport@colorado.edu. Information about university policies, reporting options, and the support resources can be found on the OIEC website. Please know that faculty and graduate instructors have a responsibility to inform OIEC when they are made aware of incidents of sexual misconduct, dating and domestic violence, stalking, discrimination, harassment and/or related retaliation, to ensure that individuals impacted receive information about their rights, support resources, and reporting options. To learn more about reporting and support options for a variety of concerns, visit Don't Ignore It.

- Religious holidays

Campus policy regarding religious observances requires that faculty make every effort to deal reasonably and fairly with all students who, because of religious obligations, have conflicts with scheduled exams, assignments or required attendance. See the campus policy regarding religious observances for full details. www.colorado.edu/policies/fac_relig.html.

- Use of AI (Artificial Intelligence)

AI will certainly be a helpful tool in current and future research. Hence, you are free to use it in this class.
