Required Textbook

Besanko and Braeutigam, “Microeconomics”, 4th edition, Wiley (3rd edition is also fine).

Course Overview

Microeconomics studies the economic behavior of individuals economic decision makers, such as a consumer, a producer, a worker, or a manager. It also analyzes the behavior of individual households, industries, markets, labor unions and trade associations. This course will perform as an intermediate step to future study in advanced Microeconomics. It also acts as an essential part of studies in international trade, labor, development and other sub-fields of microeconomics.

The course name comes as “Intermediate” which indicates this course is designed to provide students with more detailed and thorough theories and techniques beyond an introductory Microeconomics course. After a successful completion of this course, students should be able to:

1. Describe key concepts and models in words as well as in a formal mathematical way.
2. Utilize graphing and mathematical techniques to explain intuitions behind an economic question, and solve microeconomic questions.
3. Apply concepts and models to explain economic behaviors in real world.

Prerequisites

Economics Prerequisites: ECON 1000 or ECON 2010

Mathematics Prerequisites: ECON 1078 & 1088 or MATH 1300 or MATH 1310 or MATH 1081 or MATH 1080 & 1090 & 1100 or APPM 1350 or equivalent

This class requires substantial working knowledge of calculus and students are assumed to meet this requirement. There will be no formal review of calculus techniques. Therefore, the mathematics prerequisites will be strictly enforced.

Grading

Your course grade will be calculated as following:

$20\%(\text{participation})+20\%(\text{quiz})+25\%(\text{midterm})+35\%(\text{final})$

Participation

Each class I will distribute in-class practice questions. Students can form groups to discuss and complete these questions but each of you need to submit your own work separately. I will collect them at the end of class. **Please not: Your answers will NOT be graded but each completed class-assigned work will be taken as your class participation grade.** This means either missing a class or incomplete work will end up with 0 participation grade on that day.

Exams

Please note: No exams will be given early, and NO make-up exam.

There will be no make-up exams, dropped exams or early exams given for either an excused or unexcused absence. If you miss an exam for an excused absence, your final will be reweighted if you provide the necessary documentation. (i.e. if you miss the midterm your final will be worth 60% of your final grade).

The format of the exam will be short answer questions. Please bring a calculator to every exam. Cell phone & graphing calculators are not permitted. **The use of a cell phone will never be permitted and if you bring a graphing calculator 5 points will be deducted from your overall exam score.**

There will be three quizzes throughout the semester. Each quiz will cover materials since the last exam. The midterm will cover the first half part of materials in this course. **The final is cumulative.** This means you will be tested with materials from the entire semester.

Tentative exam dates:

June 7 - 1st quiz
June 14 - 2nd quiz
June 19 - midterm
June 28 - 3rd quiz
July 5 - final
