## Course Description and Objectives

International Economics is a course that covers essential economic concepts relating to the international economy and important developments in the global economy. The economic theory emphasized in the class will give the student a better understanding of the foundations for international trade. Understanding this material will allow students to relate the importance of trade to political and cultural relations.

Important developments in the world economy will be analyzed. We will look at how globalization is changing markets and impacting labor. Trends in the global economy will be studied in order to evaluate potential future changes.

## Textbook

International Economics 9th edition, by Steven Husted and Michael Melvin is required.

## Clickers

You should purchase an i-clicker from the bookstore if you do not already have one. Then you need to register your clicker, following the instructions at
http://oit.colorado.edu/node/779
If your clicker is not registered, then I cannot connect your name to your clicker ID number in order to give you credit for your clicker responses.

Bring your clicker to class every day, and before class begins set your frequency according to the posted code for our room (AC). We will often begin each class with a clicker question covering the reading, a current event in international economics, or the previous class. Discuss this question with your neighbors and submit your answer within the first few minutes of class.

My goals in using clickers are to promote active learning and to encourage you to reason through the analytical material in the course. For each clickers question one point is awarded for submitting an answer. To allow for a few missed classes or times you forget to bring your clicker, everyone is granted ten percent of the total clickers points for free. I will also not begin to record clicker answers during the first week, to allow everyone to get accustomed to this technology. With this wiggle room on the clicker points, please do not request any additional waivers for missed classes, etc.

## Grading

Your grade will come from the following breakdown:
20\% Midterm 1
20\% Midterm 2
25\% Final Exam (Cumulative)
20\% Homework
15\% Clicker Questions

## Exams

We will take a total of three exams in this course: two midterms and the final exam.
Midterms Midterm 1 - Wednesday, Sept. 21 ${ }^{\text {st }}$ Midterm 2 - Wednesday, Oct. 26 ${ }^{\text {th }}$
Final Monday, Dec. $12^{\text {th }} 1: 30-4$ PM
The final exam will be cumulative and cannot be dropped for any reason.
THERE ARE NO MAKEUP EXAMS!!! If you do miss a midterm exam, then the final will be worth 45\% of your final grade. However, you must have a valid excuse and you must notify me prior to the missed exam.

## Homework

There will be 3 homework sets assigned throughout the semester. Homework assignments will build on the material from lecture. Each assignment will be given equal weight toward your overall homework grade. Feel free to consult with others on the homework, but you must turn in your own original work.

## Cheating

Anyone caught cheating will at minimum fail the assignment in question and will be referred to the University Honor Code Council. I will determine punishment for cheating instances on an ad hoc basis, but I will not hesitate to give a failing grade for the instance in question, or for the entire course. I will report all instances to the honor code, which will mete out their own punishment, in addition to the one I deem fit. DON'T CHEAT!
