Course Description and Objectives:

Microeconomics studies the choices made by households, firms, and government and of how these choices affect the markets for goods and services. By the end of the semester you should know basic principles and concepts of microeconomics; develop clear understanding of simple economic models and use your knowledge to solve real life problems.

Prerequisites: High School Algebra. Students should be comfortable using equations, graphs and tables.

Required Text:

Paul Krugman and Robyn Wells, Microeconomics, Worth Publishers.

Study guide for Microeconomics by Paul Krugman and Robyn Wells is a helpful source for practice problems and additional reviews. This guide is entirely optional.

Grading:

Grades will be determined on the basis of your performance on three midterms, final exam, and recitation grade.

Your grade will be determined as follows:Midterm 125%Midterm 225%Midterm 325%Recitation grade25%Final25%

At the end of the semester the lowest Midterm or recitation grade will be dropped, to make your total grade add up to 100%. Your grade on the final exam cannot be dropped for any reason!

No make up or early exams will be given. **There are no exceptions to this rule**. If you miss one of the midterm for any reason, that score will be dropped at the end of the semester. Please remember that only one score can be dropped.

There will be two extra credit assignments given to you during the semester.

Each midterm will be composed of several multiple choice questions and a few word problems. The final exam is cumulative, so it is important to understand all of the concepts along the way.
