

Ling & Ting: Not Exactly the Same by Grace Lin
Taylor Harte & Kassie Spring

Art Description

After reading the book *Ling & Ting: Not Exactly the Same* by Grace Lin, we were able to compare and contrast the main characters Ling & Ting. Even though they look similar there are quite a few differences between them. On the outside of the poster, it states the unique characteristics of each twin and in the center, it shows the traits they share. It is designed as two puzzle pieces fitting perfectly together in the center to show that even with their differences, they keep a strong relationship with each other. We also had arrows pointing at parts of the body that related to the specific character traits we were talking about. For example, we drew an arrow to the girls hands because they use their hands to make dumplings. We used markers, colored pencils, and a poster board to represent our non-traditional venn diagram to compare and contrast the two sisters! This project allowed us to illustrate the theme of the book clearly.
