Distribution Center	Opposite service desk
LASP	1 st floor hallway
Space Science	In entry, near reception
Transportation	Past service office, left side

Any/all small sealed battery types are accepted in the collection containers including: alkaline batteries, rechargeable batteries, lithium cells, nickel-cadmium, sealed lead acid, button-cell, cell-phone batteries, laptop batteries, etc. For large and/or unsealed battery types, use the HMW tag for disposal.

Do you want to help even further? Please apply tape to all battery terminals or place each battery separately into a plastic baggie to prevent short circuits while in transit to the recycling facility. The university recycles all battery types.
