

Action Plan Development Phases

Phase 1: Organizational Unit Inventory & Discovery

- Collect computer and server inventory data
- Assess computers: determine Secure Computing status or actions

Phase 2: OIT Observation & Summarization

- Validate workbook data summarization & roll up
- Provide Security observations, risk identification & recommendations

Phase 3: Unit Secure Computing Plan Development

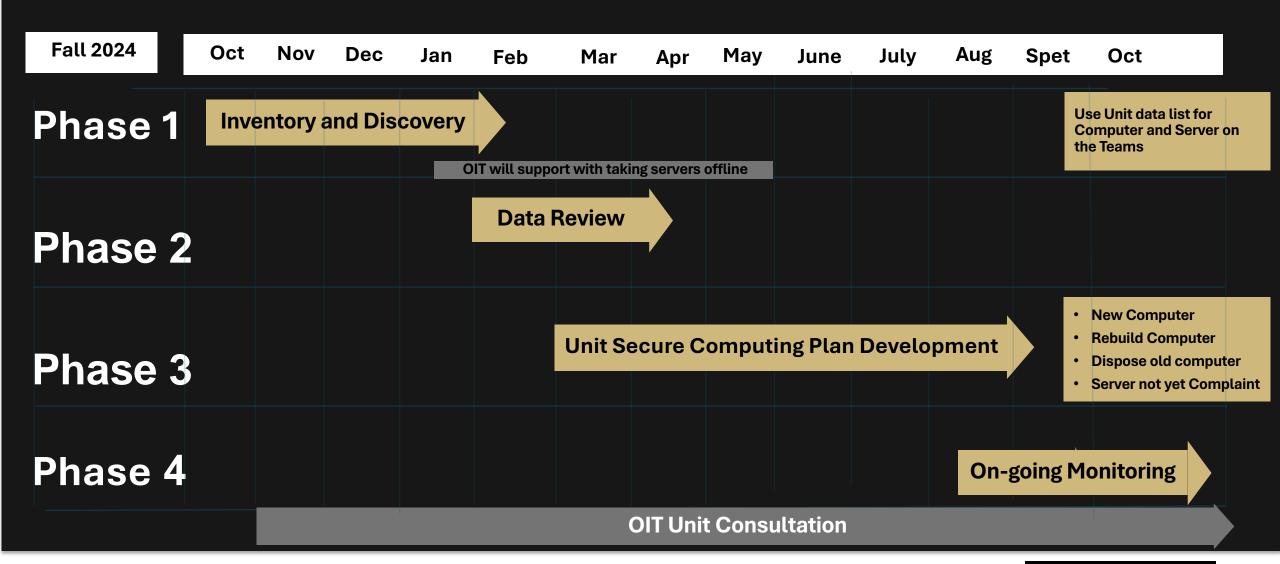

- •Unit level to define plans for computer replacements or rebuilding to enroll computers
- •Review unit level impact to budgets and resourcing to meet Secure Computing adherence

Phase 4 On-going monitoring

- Consultation with units, health assessment
- OIT to Develop and then monitor dashboard
- •Unit Leadership to attest Unit level alignment to Secure Computing Campus standards
