

Get Involved with the BOLD Center

An Inclusive Community for CU Engineering!

Mission

We advocate for and support equitable student success by broadening access to opportunities, community and leadership among our students.

Values

The Broadening Opportunity through Leadership and Diversity (BOLD) Center is guided by our values of **community**, **leadership** and a **growth mindset**.

BOLD Scholarship

Engineering students valuing a diverse and inclusive community are encouraged to apply for BOLD's scholarship program as a part of the general application.

- » First-year scholars participate in an orientation program and live together in the residence halls.
- » Our program supports scholars through community building, academic resources, and professional development.
- » BOLD facilitates leadership skill development, partnering with alumni and industry to promote internship and career opportunities.

Academic Services

The BOLD Center is invested in the academic success of scholars and student society members. As a scholar and active society member:

- » Access our dedicated Learning Lab with free course tutoring and academic skills workshops.
- » Participate in group study and exam preparation sessions with fellow scholars.
- » Connect with undergraduate research and education abroad opportunities.
- » Learn about graduate degree programs.

"It is awesome being able to connect with students from so many diverse identities in the entire College at the BOLD Center. It is a powerful community!"
~BOLD student

Student Societies

We support nine affinity-based, professional engineering and STEM societies to provide a variety of programming and leadership opportunities:

- » American Association of Engineers of Indian Origin (AAEIO)
- » American Indian Science & Engineering Society (AISES)
- » National Society of Black Engineers (NSBE)
- » Out in Science, Technology, Engineering, and Math (oSTEM)
- » Society of Asian Scientists & Engineers (SASE)
- » Society of Hispanic Professional Engineers (SHPE)
- » Society of Women Engineers (SWE)
- » Women in Computing (WiC)
- » Women in Aeronautics and Astronautics (WAAA)
