

Get Involved with the Campos Student Center at CU Engineering!

Mission

We advocate for and broaden access to opportunities, community and leadership for our students.

Values

The Campos Student Center is guided by our values of **community**, **leadership** and a **growth mindset**.

Community

Leadership

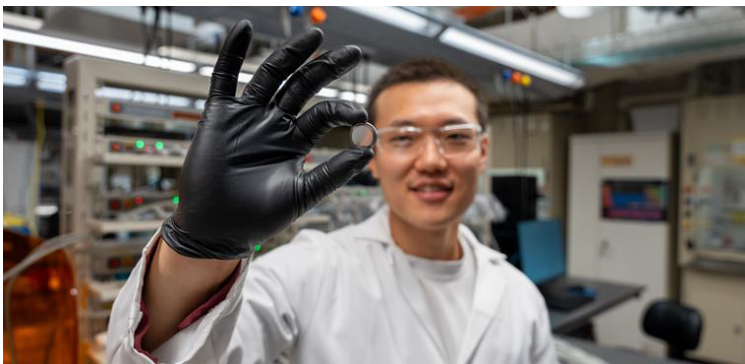

Growth Mindset

BOLD Scholarships

All undergraduate engineering students are invited to apply for our scholarships as a part of the general campus scholarship application.

- » First-year students participate in an orientation program and live together in the residence halls.
- » Our program supports scholars through community building, academic support and access to leadership and professional opportunities.
- » We facilitate leadership skill development, partnering with alumni and industry to promote internship and career opportunities.

Academic Services

Access our dedicated Learning Lab with course tutoring and faculty engagement for our scholars and active society members.

- » Participate in group workshops and study sessions with fellow scholars.
- » Engage students with undergraduate research, education abroad and professional development opportunities.
- » Partner with industry for internship opportunities.

Student Societies

We support nine affinity-based, professional engineering and STEM societies. They are open to all CU Boulder students and provide programming and leadership opportunities such as:

- » Serving as an executive board member
 - » Organizing career and industry networking opportunities
 - » Hosting cultural affirming and community building programming
 - » Participating in regional and national professional organization conferences
 - » Hosting, organizing and running an annual student-led conference
 - » Entering national STEM competitions
 - » Engaging with middle & high school students for STEM outreach
-
- » American Association of Engineers of Indian Origin (AAEIO)
 - » American Indian Science & Engineering Society (AISES)
 - » National Society of Black Engineers (NSBE)
 - » Out in Science, Technology, Engineering and Math (oSTEM)
 - » Society of Asian Scientists & Engineers (SASE)
 - » Society of Hispanic Professional Engineers (SHPE)
 - » Society of Women Engineers (SWE)
 - » Women in Computing (WiC)
 - » Women in Aeronautics and Astronautics (WOAA)

Student Outcomes & Impact

2,500

CU Boulder students participate in center programs and services

25%

of our total undergraduate engineering population (n = 1,700)

1,000+

student society participants in our nine affinity-based student organizations

"The community has helped me to network with not only industry professionals but with other students. It has given me opportunities and a sense of belonging I would not have achieved elsewhere."

127

society members attended national or regional conferences for professional development

78

student society executive members leading the nine societies

104

scholars graduated in the '24-25 academic year

"The center has helped to financially support me throughout my college career and introduced me to opportunities and people who I otherwise would have never known of!"

 **19**

students (7 BOLD and 12 Lattice scholars) participated in the center's sponsored Fundamentals of Undergraduate Research course

 **11**

students (58%) will be continuing in a CU Engineering research program

 **87%**

of annual community survey respondents felt moderately to very prepared for coursework because of participating in academic services

96%+

of annual community survey respondents agree that staff are invested in their success and feel the center provides a physical space to connect with peers

91%

second-fall retention rate for BOLD scholars

Scholars' six-year graduation rate

73%

from college

85%

from CU Boulder overall

"The center has been such a special place for me in Boulder. It's easily one of the best study spots on campus, and the staff is incredibly kind and supportive. I'm always welcomed by a friendly face, which always motivates me to keep pushing forward."
