Quick & easy way to find courses approved as humanities/social sciences electives for engineering students

- Use the “Class Search” feature in the MyCUInfo.colorado.edu registration system
- Expand the “Additional Search Criteria” area
- Scroll down to “Class Attribute”, chose “Boulder A&S Core Requirements” and chose one of the following categories from the “Course Attribute Value”:
  - Contemporary Societies
  - Foreign Language
  - Historical Context
  - Human Diversity
  - Ideals & Values
  - Literature and the Arts
  - United States Context

You can also restrict the search by:
- Clicking on the box for “Show Open Classes Only”
- Using “Days of Week” in “Additional Search Criteria” to include or exclude certain days

You can also use the “Class Search” feature in the MyCUInfo.colorado.edu registration system to search for approved HSS courses not in the “Arts & Sciences Core” areas above. You simply would use Class Search to see if any of the courses listed under (2) - (5) at www.colorado.edu/engineering/academics/policies/hss are being offered this semester.
