

# Music Production Outpost

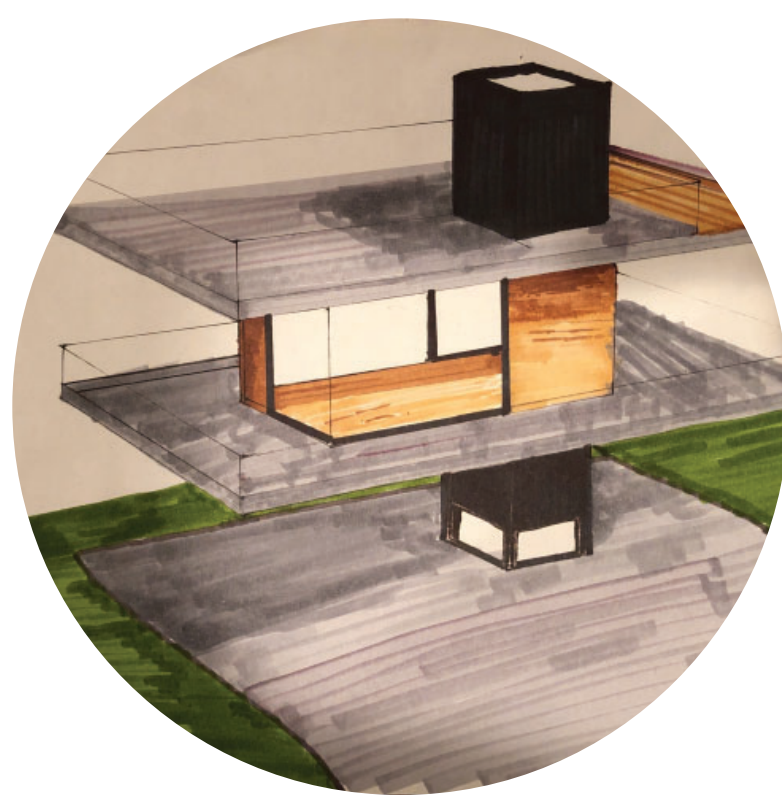

Joe Aiello - Client: Luke Bowers - ENVD 1120 - December 7, 2020

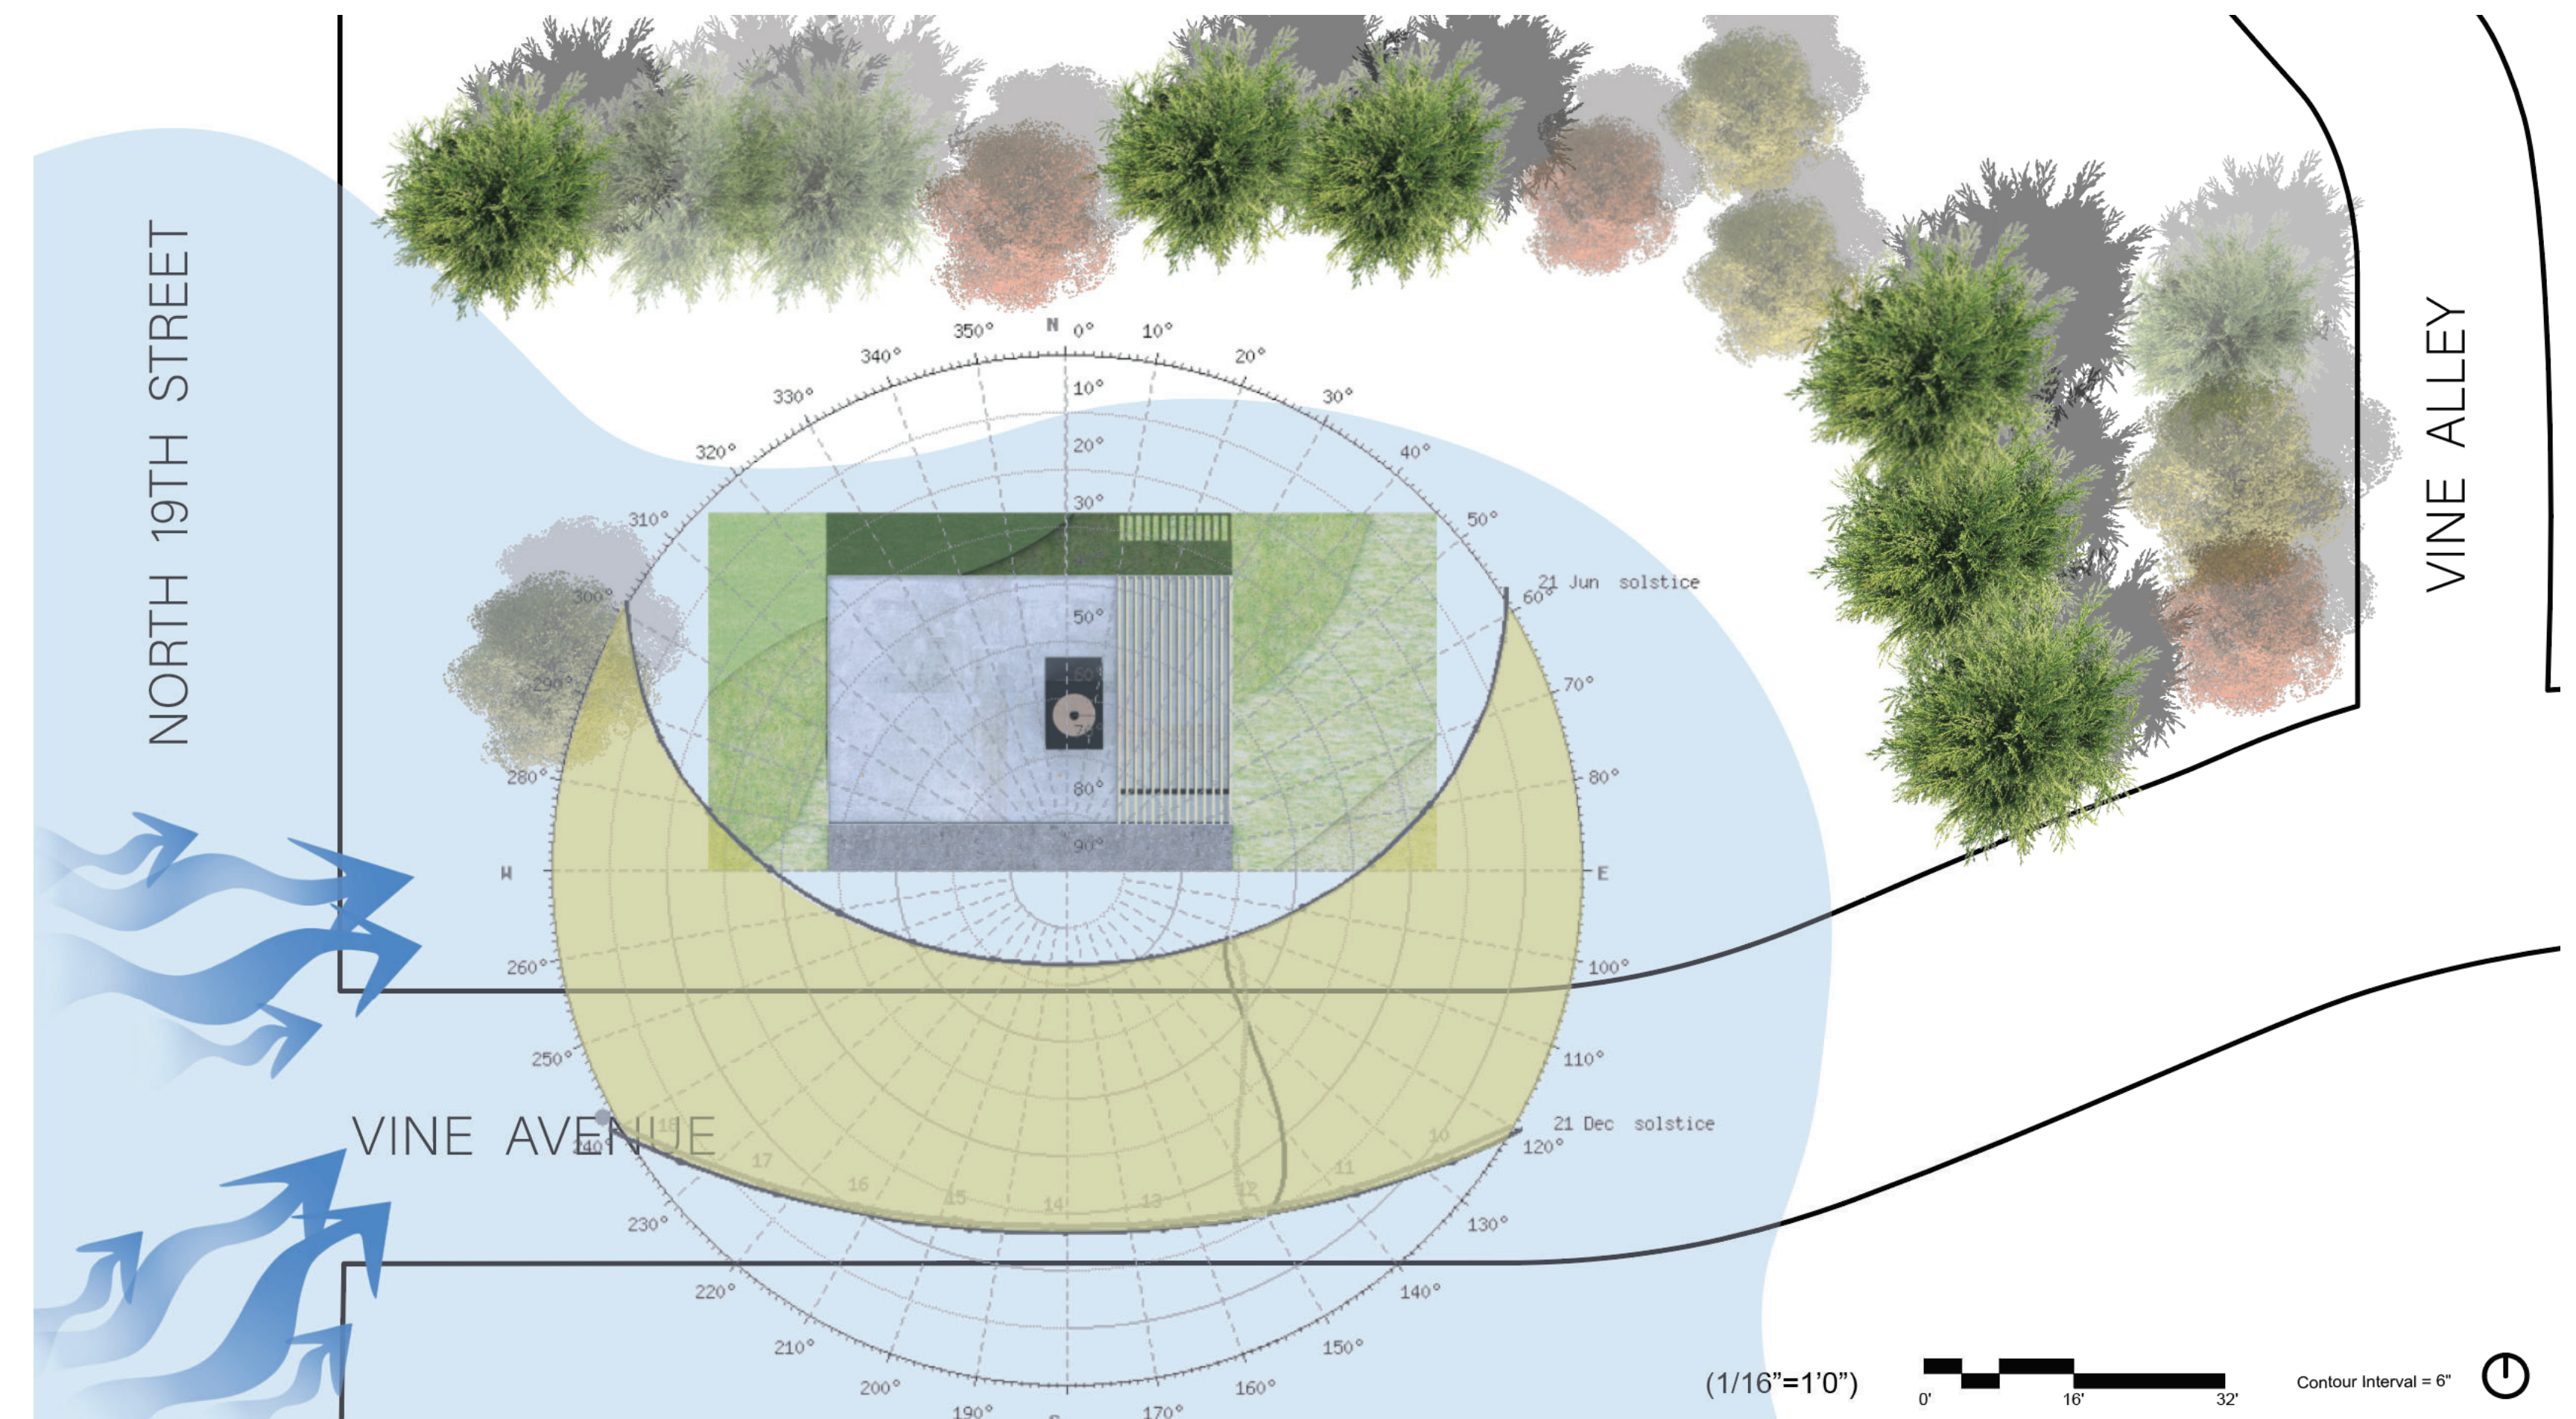

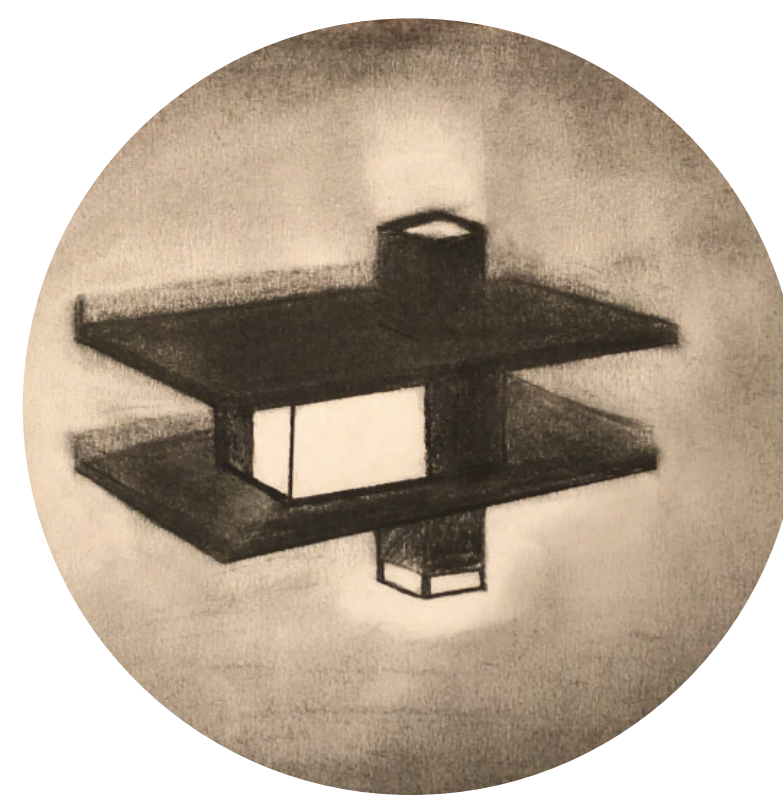

## Objectives:

1. Optimize View
2. Utilize Natural Light
3. Elevate From 2013 Flood Extent
4. Create Uplifting and Functional Spaces

An escape from the same old grind... A place to rest your mind... Luke's ideal retreat is a modern music production studio that transforms from a creative workspace during the day; into an illuminating place to dance and listen to music at night. As you climb the spiral staircase, creativity and rhythm are brought to light. The studio is a place for Luke to synchronize with harmony and soul; where his passion for making music comes to life. Inspirational views from his desk captivate and dazzle with the repetition, beat, and texture of the rolling hills in the distance. Reflection sets in at the wraparound deck; a place to rest and acknowledge the fruits of labor in ecstasy. Perched upon the sun deck is where Luke appreciates his ingenuity and gift of music. The outpost fills Luke's mind and body with the clarity he needs before reconnecting to his daily life.
