**Internship available these semesters (please mark one or more semesters):**

Spring  Summer  Fall

**Brief description of Your Organization:**

At Intern Abroad HQ, we take the stress out of finding an affordable international internship. We coordinate everything for your students – from sourcing, securing, and customizing their internship placement to sorting out their accommodation, organizing their airport pick up, and more.

We match interns with innovative, entrepreneurial, and industry leading host organizations around the world that give you the opportunity to make a real contribution on high impact projects.

Our in-country and remote internships cultivate the job-ready skills they simply can't get at home. They are designed to give students the hands-on experience, cultural intelligence, self-awareness, and international exposure they'll need to stand out in today's competitive job market.

**Describe the nature/goals of the project(s):**

While we have a number of career fields that we cover, Intern Abroad HQ offers a broad range of environmental internships with opportunities for undergraduates, graduates and young professionals with environmental science majors like Marine Biology, Agriculture, Wildlife Conservation and more.

These Environmental internships offer the unique opportunity to gain both practical and theoretical experience on real world projects. Internships for Environmental Science majors are available both abroad and remotely. With year-round start dates, flexible durations and the most affordable fees, these internship programs can be customized to meet your academic requirements or career goals.

**Please list required and/or desired skills and qualifications:**

English speaking, at least one semester of coursework completed, age 18+
