

# **Paid Full-time Summer Internship in Water Conservation**

## **Irrigation Auditor for Aurora Water**

Aurora Water's Conservation Department is looking for outgoing students to help educate our customers on how to conserve water by making their automatic sprinkler systems more efficient. Work one-on-one with our customers, perform audits of their outdoor water use, provide a final efficiency report and short and long-term methods for reducing consumption.

We will provide comprehensive training in irrigation system components, operational efficiency, controller programming and detailed audits. You will provide an outgoing personality, a desire to learn and a professional work ethic. The internship also involves collecting field data, in office analyzing and reporting, long hours spent outside and frequent work in our demonstration garden. Solid communication skills, flexibility and ability to sport a farmer's tan are a must.

**You do not need any prior experience but preferred current coursework includes:**

- Environmental Science/Policy
- Landscape Management
- Landscape Architecture
- Horticulture
- Irrigation Technologies
- Water Management/Operations
- Resource Management

Come gain practical experience in field reporting, customer service, residential and commercial irrigation system operations and inspections, modern water conservation technology and practices, data analysis, water efficient landscaping/horticulture and community outreach programs all while helping protect our beautiful Colorado environment through conservation.
