You are cordially invited to our Keysight Information Session
Tuesday, February 24th, 2015 from 5:30 – 7:30 PM in Engineering Center, ECCR Rm 245.

We have more than **30 full-time and over 20 intern positions available** in California (Santa Rosa and Santa Clara), Colorado (Loveland and Colorado Springs) Washington (Everett) and New Jersey (Budd Lake). We will have a complete description of all open requisitions at this event.

Never heard of Keysight? Not surprising since our first “official” day of operation was August 1, 2014 when we split from Agilent Technologies.

Although we are new, our heritage dates back 75 years to the original Hewlett Packard that launched Silicon Valley! Keysight Technologies Inc. (NYSE: KEYS) is the world's leading electronic measurement company, transforming today's measurement experience through innovation in wireless, modular, and software solutions. With its HP and Agilent legacy, Keysight delivers solutions in wireless communications, aerospace and defense and semiconductor markets with world-class platforms, software and consistent measurement science. The company's 9,500 employees serve customers in more than 100 countries.

Come and learn who we are, where we came from and where we are going – **We've had a legendary Past – now become part of our exciting new Future!**

The event will feature a brief introduction of Keysight, a couple of representative demos of what we make and lots of time for Q/A with recent CU grads working at Keysight – **oh yeah pizza and drinks will be provided.**
