Correlation coefficients range from -1.0 to 1.0 , and indicate the direction and strength of the relationship between two items.

Occasionally some (but not all) correlations will be missing. This can happen if all students give the same rating on a particular item.

Median is the middle score when all ratings are rank-ordered. SD (standard deviation) is the DISagreement among raters.
Difference of your average from the group average for Dept, College, and Campus ranges from --- to +++. $0=$ negligible difference.
Percentile $=$ percentile of your average rating within a particular group: Dept, College, and Campus.
** 'Diff from' and 'Percentile in' statistics not displayed if comparison group has fewer than 10 sections.
A confidence band indicates an interval within which we are $95 \%$ confident that the 'true' value of the average lies.

Blank (BL) and non-applicable (NA) responses are tallied but excluded from averages.
