

New Features in CUBE for 2017

- **Automatic Claiming of Publications**
 - Faster claiming of publications by using author identifiers (ORCIDs, ResearcherIDs, and Email Addresses).
 - Faculty can set their profiles to **automatically claim** publications coming through the data feeds that match their ORCID, ResearcherID, or email address.
 - ORCIDs included on publication submissions allow publications to be claimed automatically in the future and will flow to FRPA and Altmetric more swiftly.
 - Reduces disambiguation problems for faculty with common surnames.
- **New look for the CUBE Home Page**
 - Easy to see the full menu.
- **New Data Sources**
 - Expanded coverage and automatic publication harvesting for faculty in the humanities and social sciences.
 - Modern Language Association International Bibliography (MLA)

What Is Not Changing

- Data entry and claiming page look the same.
- Manual entry pages for publications and creative works have not changed.
- All CUBE publications and creative works flow directly to your FRPA.
