

In CASE You Were Wondering – Project Update Newsletter #15 – Aug 4, 2017

CP007596 - EPRK - EUCLID AVENUE AUTOPARK ADDITION (290)

Stone work and roof work continue around the building, windows are being installed, and drywall is going up on the interior walls, as the site work begins on the north side.

As always, feel free to contact Stephen Graziano with any questions or concerns.

<http://www.colorado.edu/fm/case>

Geofoam

Giant white geofoam blocks have started to arrive, and along with soil, will be used to create the landscaped hill on the north side of the site. Please plan on increased construction activity and traffic, including truck deliveries from 18th Street. Thanks for your cooperation and patience.

North Sidewalk Detour in Progress

The sidewalk detour through the VAC plaza is in place and is working well. Please remember that this is a dismount zone for bikers and skateboarders.

Service Area Access

The gates at the service area between the UMC and the CASE building have been removed, however, there will be flaggers monitoring the dock traffic during student move-in week and the beginning of classes.
