

In CASE You Were Wondering – Project Update

Newsletter #16 – Sep 8, 2017

**CP007596 - EPRK - EUCLID AVENUE
AUTOPARK ADDITION (290)**

Earth, stone, and roof work continue all around the building, as windows and drywall go up on the interior. Sidewalk work begins this month.

As always, feel free to contact Stephen Graziano with any questions or concerns. <http://www.colorado.edu/fm/case>

The North Hill

The geofoam blocks are nearly in place along the north side of the building, and earth is being moved onto the site to create the north hill that will slope down to the VAC plaza. Thank you for your continued cooperation and patience with the increased construction activity in this area.

North Sidewalk Outage – Phase One Sep. 25 thru Oct. 20, 2017

As part of the north site work, we will be reconfiguring the north sidewalk. This work will be done in phases with the first phase closing the sidewalk for approximately 4 weeks beginning September 25, 2017. There will be a variety of routes around the closure and detour signs will direct campus travelers either north or south, depending on their destination. The TLC building main entrance will remain open during this phase.

Please continue to help us encourage pedestrians, bikers, and commuters to find alternate routes around the site to reduce congestion and maintain the safest environment possible throughout the project.
