ADMISSIONS ROLES & RESPONSIBILITIES

The Graduate School

- Setting policies and minimum admissions standards for applicants admitted to graduate programs
- Approving exceptions to policy or standards
- Provide application submission advice to Project 1000 and McNair scholars, and process fee waivers
- Updating the graduate application materials in conjunction with the Office of Admissions and departments
- Maintaining the online application system
- Maintaining the Graduate School Admissions website
- Updating the Graduate Prospective Student websites on an annual basis with changes provided by the departments
- Creating and distributing general campus information applicable to graduate applicants
- Process Criminal History and Suspension/Expulsion forms, both pre- and post-admit
- Provide policy and procedure training and documentation for Graduate School policies and Application System software and tools
- Assist Graduate Program Assistants (staff) and Faculty with acquiring access to Application System Tools
- Provide training on using systems and tools associated with the application to department staff
- Helping staff troubleshoot issues with the tools and systems
- Provide assistance to applicants who have questions about the functionality of the on-line application system

Graduate Admissions Processing Team

- Receive and upload to Slate all application support material
- Update applicant checklists in Slate
- Update applicant status in Slate
- Make any necessary changes to application term, program, or plan as requested by the applicant and/or department
- Post admission decision processing
- Maintaining official university records in Slate and CUSIS for admitted students through the admission process and transferring records for those who matriculate to the Registrar’s Office
- Generate Official Admissions email with instructions about how applicants can confirm intent to enroll and provide confirmation deposit information
- Canceling admissions at the applicant’s or department’s request
- Setting suggested admissions deadlines (i.e. Spring – October 1, Summer & Fall – December 1)
- Pre-admission materials evaluation for applicants (International)
- Post-admission credential evaluation (International)
- Evaluating foreign credentials submitted by international applicants for some departments
- Monitoring minimum TOEFL scores of admitted international students for English proficiency (International)
- Confirm TOEFL & financial support of admitted international students who need F-1/J-1 visa/status (International)
♦ Issuing immigration documents, specifically for the F-1 visa (International)
♦ Complying with SEVIS regulations as they apply to newly admitted international students (International)

Departments
♦ Program Pages on the Graduate School website – these are website pages managed by the Graduate School that provide a summary of your department’s admissions requirements and deadlines. It is the responsibility of each department to make sure all information contained on these pages is accurate and matches the information on their own website pages.
♦ Maintain Department website with information for prospective applicants:
  a) State the department’s minimum qualifications, deadlines, deadlines for equal consideration, and special requirements clearly in all documentation, responses, and websites.
  b) Provide a clear statement about your department or program’s ability to provide financial support. Refer to The Graduate School web site to provide additional information and sources for funding. https://www.colorado.edu/graduateschool/graduate-student-funding
  c) Assure prospective students that they have received complete information by putting your brochures and other materials in PDF files or outlining the steps a prospect should complete in acquiring information.
  d) Be aware that there are campus web policies and style guides and that all material should comply with these policies. See https://www.colorado.edu/brand/.
♦ Work with Graduate School staff to ensure information on Graduate School Program Pages are up to date and accurate
♦ Communicate with prospective applicants and students regarding department requirements and admissions processes
♦ Manage the faculty review process and timeline
♦ Communicate any changes to an applicant’s application to Graduate Admissions Processors
♦ Notify applicant of acceptance or refusal to the department in a timely manner
♦ Set application deadlines for domestic and international applicants
♦ Each graduate department is responsible for setting its own policies and procedures for processing domestic applications, evaluating applicant files, making acceptance/refusal decisions, forwarding transcripts or any applicant materials to the Graduate Admissions Processors or International Admissions for final admissions assessment, and communicating/troubleshooting admissions issues with their assigned Graduate Admissions Processor
♦ Communicate with prospective students, applicants, and admitted students
♦ Responsible for providing application-related information to all applicants or helping them with information in their portal. Applicants should not be referred to the Graduate School or the Graduate Admissions Processor to receive their application status.
♦ Accept or deny students admission to a graduate program based on academic qualifications
♦ Award departmental financial aid (fellowships, TA or RA appointments) using the provided templates https://www.colorado.edu/graduateschool/faculty-and-staff
♦ Work with applicants or students to resolve holds placed on their account
ADMISSIONS TERMS & DEFINITIONS

Admissions Stops
If official transcripts, degrees, or credentials are still missing by census date for the term of admission, an admissions stop will be placed on that student's record, preventing future registrations. By this time the student has been notified (unless they were a very late admit) at least once and in most cases twice, that the credentials are needed.

Application Fee
Graduate application fees:
♦ Are non-refundable unless the payment was duplicated in error. In that case refunds will be processed by the Graduate School, please contact allison.metzger@colorado.edu.
♦ $60 – domestic applicants, $80 – international applicants
♦ Can be paid by the department on behalf of the applicant.
  a) If the department chooses to pay the fee on behalf of the applicant, you may request this by providing the speedtype, name of the student, and whether they are international or domestic. This is an unallowable cost on a sponsored project. Contact allison.metzger@colorado.edu to request this transfer.

Graduate application fees are not required if:
♦ If a graduate student is going from one graduate degree level to another in the same department without a break in their education (summer does not count as a break). This includes Master's to Doctoral as well as Doctoral to Master's. Submit the completed Graduate Program Change/Addition/Discontinuation Form to the Registrar’s office via password-protected email attachment to iut@colorado.edu, via campus mail to 20 UCB, or in person to Regent Administrative Center room 101.
♦ If a graduate student is readmitted and is returning to the same graduate degree program at the same level (i.e. master's or doctoral). Readmits should not fill out the online application and instead should be instructed to fill out the readmit application and submit to the department.

Waivers – The Graduate School does not grant application fee waivers, with the exception of:

AmeriCorps (currently serving), Black in AI (BAI), Building Infrastructure Leading to Diversity (BUILD) Initiative, Gates Millennium Scholars, Leadership Alliance, Life Sciences Summer Undergraduate Research Program (LSSURP), Louis-Stokes Alliance for Minority Participation (LSAMP), Math Alliance Scholars, McNair Scholars Program, Mellon Mays Undergraduate Fellowship Program, Minority Access to Research Careers (MARC) Scholar Program, Peace Corps (currently serving), Postbaccalaureate Research Education Program (PREP), SMART, Society for Advancement of Chicanos/Hispanics and Native Americans in Science (SACNAS), and Teach for America.
If an applicant is affiliated with one of these programs, please have them send us proof of their affiliation to contact gradadm@colorado.edu to request a fee waiver after they have started an application and before they submit.

If an applicant is in the U.S. military they will receive an automatic fee waiver as a thank you for their service (active duty, veteran, previously served, and active reserve are all eligible for this automatic fee waiver).

Application Status Inquiries
Departments are responsible for answering applicant inquiries and providing application status information to their department’s applicants. Applicants are encouraged to check the status of their application on their application status page: grad.apply.colorado.edu/apply/status. This is where applicants can login and check the status of their application and what materials have been received or are still outstanding. Once admissions decisions are made, admitted applicants will be able to review their status, confirm their intent to enroll and pay their confirmation deposit online. Students use the same login credentials as for the application.

Applicants should not be referred to the Graduate School or the Graduate Admissions Team to answer inquiries about missing materials or to receive their application status.

Cancellations
Applicants who have been accepted by a department can decline a department’s offer of admission online in the portal. If the applicant contacts you directly, notify your graduate processing liaison and they will change the status of the application in Slate.

Admitted and confirmed applicants must cancel their intent to enroll in writing to the department.

Copies of the applicants’ correspondence should be attached in an email sent to the department’s graduate processing liaison who will change the status and attach the correspondence to the applicants’ account.

Checklists
Application checklists are created automatically in Slate when an applicant submits their application.

Checklist items consist of:
- Application Fee
- Required Official Test scores
- Letters of Recommendation
- Unofficial Transcripts
- Department-specific required documents (if applicable)

Applicant checklist items will be updated by a graduate processing liaison as information arrives. The checklist information will be displayed to the applicant on their status page,
grad.apply.colorado.edu/apply/status, where applicants can also check their application status in real time. Note, it can take 1-2 weeks for newly received items to be processed by the processing teams.

Conditional Admissions
Applicants who do not meet departmental standards of admission may be admitted conditionally by the department and then monitored for compliance at the department level. There is no notation for a conditionally admitted applicant and the Graduate School is not involved. The department should notify the student when their conditions have been met.

Confirmation deposit
The confirmation deposit is always required. Applicants can pay the confirmation deposit and confirm their intent to enroll on their status page: grad.apply.colorado.edu/apply/status after being admitted.
♦ The confirmation deposit cannot be waived. Contact Admissions with any questions or extenuating circumstances.
♦ The confirmation deposit should not be paid for by the department.
♦ Continuing students (those moving from one program to another without a break) do not need to pay another confirmation deposit.

Deadlines & Dates
♦ Application Deadlines - Each department sets the deadlines for applicants with guidance from the Graduate School. The posted deadlines cannot be easily changed, so be sure you are taking into account the departmental review timeline when these are set.
  o Extensions – Deadline extensions are done manually on an individual case-by-case basis when requested by the department. Contact Allison Metzger to request an extension.
♦ Application Software Deadlines - Each department should communicate their application deadlines to the Graduate School so that the application system can reflect those dates for each term. Departments may have two different deadlines for international and domestic applicants.
♦ Department Admissions Decision Deadlines - Departments have varying methods for making decisions about admission to graduate programs. Some have a single deadline and make all their decisions at one meeting. Others have rolling admissions and/or multiple meetings when decisions are made. The GPA is generally expected to keep track of where applicants are in the process, where materials are while being routed to faculty, and when decisions are made.
♦ Census Date – Is the day after the official drop/add class date. These dates change every year, and can be found on the Registrar’s website.
♦ Confirmation Deadlines – This is the deadline whereby an applicant confirms their acceptance to the department’s offer of admission. Applicants should be encouraged to confirm online through the graduate portal. We support a resolution by CGS (Council of Graduate Schools) which states that institutions who are offering some kind of financial support CANNOT expect an answer from their admitted applicants before 4/15.
♦ The standard confirmation deadline dates are: spring-December 15, summer-May 1, fall-June 15. If your department wants to use an earlier date, you should communicate that in your letter of acceptance.

Deficiencies (admissions with)
This occurs when an applicant is identified as having deficiencies in their academic background such as missing coursework. In these situations, the department usually requires specific coursework to be completed by the student within a set period of time. The Graduate School is not involved in this process.

Dual Degree
If a new applicant intends to complete a dual degree, the applicant must apply to and be accepted by each department. The applicant will then be contacted by admissions to choose which of the two departments they wish to be admitted to first. After the student has matriculated, the GPA of the second department should complete the Graduate Program Change/Addition/Discontinuation Form to add the second program, and submit it to the Office of the Registrar via password-protected email attachment to iut@colorado.edu, via campus mail to 20 UCB, or in person to Regent Administrative Center room 101.

External Database Usage Policy
*The use of external databases is highly discouraged – all application review should occur within Slate. Even if an external database is used, decisions MUST be posted in Slate.*
Departments sometimes use databases – which must be approved by Registrar to prevent critical data loss and/or security breaches- to track documents within the department. Evaluate your application pool and department procedures to determine the most effective process for your office.

♦ The department understands and acknowledges that the data they have been granted access is protected under Federal Family Educational Rights and Privacy Act (FERPA) regulations, Colorado state privacy breach law (CRS §6-1-716), and University security policy [https://www.cu.edu/ois/policies-and-resources](https://www.cu.edu/ois/policies-and-resources). Departments shall seek guidance from the campus IT Security Office regarding how to protect data in compliance with the campus private data security standard. It is the responsibility of the department to ensure that security requirements are implemented including:
  a) All faculty and staff who receive access to graduate applications must have completed the University information security and privacy training.
  b) All systems which store private data meet minimum security standards including keeping both application and operating system software up to date and maintaining current client security software.
  c) Access to systems storing data are password protected and usernames/password combinations are unique to each user.
  d) Data is protected from unauthorized physical access by ensuring that physical copies of data are not left in plain sight, information is not displayed when not in use, and devices storing data are in a secure physical location when not in use.
e) Data is transferred using secure mechanisms.
f) Data is encrypted when stored on workstations, mobile devices, or external storage devices.
g) Data will not be transferred to a non-University owned and managed computer system.

♦ The department understands that should data be exposed the department will be responsible for costs related to incident including forensics investigation and notification to the individuals whose privacy may have been violated. The department shall promptly notify the campus IT Security Office should the department have cause to believe that the data has been exposed or if the system storing data may have been compromised. Once the IT Security Office has been notified the department must wait for further instruction.

For assistance with data security contact the IT Security Office (ITSO) by e-mail security@colorado.edu

**Intent to Enroll**
Applicants can pay the $200 confirmation deposit and confirm their intent to enroll on their status page: grad.apply.colorado.edu/apply/status after they are admitted.

**Letters of Recommendation**
In the online application, a system-generated letter of recommendation email request is sent to the letter writers/recommenders. Applicants provide the email contact information in the application, and these are sent out when they hit ‘send to recommender.’ This may be done before the application is submitted, but if they do not hit ‘send to recommender’ then the emails will be sent upon application submission.

♦ The applicant receives an email notification when recommenders have submitted a letter of recommendation on their behalf.
♦ Applicants can send ‘reminders’ to their recommenders either from the application (if not yet submitted) or from their status page.

**Multiple Applications**
Applicants may submit applications for multiple programs. However, the applicant can only confirm their intent to enroll to one program. If an applicant is admitted to multiple programs, Admissions will contact the applicant to have them choose a program.

**Negative Service Indicators**
Negative service indicators convey that an action needs to be assessed or taken with regard to the applicant’s admissions process or a student’s account. Most service indicators are initiated by the department and activated by the Registrar’s office. These are found in CU-SIS rather than in Slate.

♦ Some Negative Service Indicators indicate holds placed on an applicant’s or student’s account by their home department, Admissions, Registrar, or Bursar’s office. Please click on the Negative Service Indicator icon to review information.
♦ Holds placed on an account can prevent the student from registering for classes.
Applications and students with Negative Service Indicators should work with their home department’s GPA to determine the nature of the hold and how to have it removed.

**Notification of Accept/Deny to Applicants by the Department**
Departments are responsible for filling out the Decision Form in Slate (or moving files to the Deny bin after they are reviewed), and sending out the accept/deny letters promptly once an application is in either the Admit or Deny Bin, thus allowing applicants to see their new status on their status page: grad.apply.colorado.edu/apply/status These letters must be sent in a timely manner. There are illustrated guides available for the Admit/Waitlist and Deny process.

Acceptance letters may or may not include an offer of financial assistance. The Letter of Acceptance template is available at https://www.colorado.edu/graduateschool/faculty-and-staff

**Official Notification of Admission to Applicants**
In Slate, all admission offers should include the GS Admit letter and the custom letter from the department. Applicants receive a message notifying them of an update to their status, and then they can look at their admission letters on their status page. After viewing that letter, a form appears on their status page which prompts them to confirm their intent to enroll and then pay their confirmation deposit. Afterwards, they get another status update which contains their CU-SIS ID and instructions on setting up Identikey information, their CU email, etc.

**Program/Plan/Subplan Changes**
If an applicant needs to change the program/plan/subplan or level of their application the GPA will complete the applicant data change form (domestic or international) and email to gradprocessing@colorado.edu or intlgrad@colorado.edu.

**Regular and Provisional Admission with Graduate School Approval**
The Graduate School requires that all applicants have:

1. A GPA of at least a 2.75 (on 4.0 scale, 2.00=C) undergraduate grade point average (for engineering 3.0)* and

2. Hold a baccalaureate degree from an accredited college or university, or have done work equivalent to that required for such a degree.

Students must also meet all departmental requirements. A unit may request regular or provisional admission for an applicant who does not meet Graduate School minimum thresholds within the two parameters listed below. No offer of admission should be made to the applicant without prior Graduate School approval.

*Applicants may still secure regular admission if they have completed 9 semester hours of relevant graduate course work with at least a 3.25 average. It is not necessary to receive Graduate School approval to admit those applicants.

1. Undergraduate GPA below minimum
If a unit wants to admit an applicant with an **undergraduate GPA below the threshold** they may request Graduate School approval to admit the applicant either regularly or provisionally.

- The unit may request that the student be admitted regularly based upon a full and holistic review of the applicant’s record.
  - Upon approval, the student will be subject to regular academic standing and continuation requirements.
- The unit may request that the student be admitted provisionally. Note that students admitted provisionally may not hold a graduate appointment without approval, and that international applicants cannot be given I-20 documentation for matriculation if admitted provisionally.
  - Upon approval, student must fulfill the corresponding condition before change to regular status; they must maintain a 3.0 GPA while completing 12 credits of graduate course work over 2 semesters (4 semesters for part-time students)

2. **Undergraduate degree not yet awarded**

If a unit wants to admit an applicant who will not have **completed the bachelor’s degree** prior to matriculation they may request Graduate School to admit the applicant provisionally.

- Upon approval, the student must fulfill the corresponding condition before change to regular status; they must complete the Bachelor’s degree and provide their final transcript. (The degree must be completed within 1 semester of admission).

If you wish to make such a request for either of these reasons, use the form provided in Slate. Open the Decision Form, and if the warning appears with a link to the Request for Provisional or Regular Admission Form, click that link and fill out the form. Select the requirement not met and the corresponding request for regular or provisional admission. Explain the reasons for the request and the reasons your unit feels the applicant can be successful in the program. Detail the additional support your department can provide upon matriculation to facilitate student success. After you submit this form, it will close your window, so you will need to log back into Slate to submit your Decision Form.

After Graduate School review, if the request is approved, the file will automatically move from the GS Admit Check bin into the Admit bin (if no other holds to admission are present). At that point, you may continue with the admission process and send the Admit letter.

**Readmissions**

Formerly enrolled graduate students wishing to return to the same degree program must reapply and be readmitted. Since graduate students seeking readmission were previously enrolled in the same graduate program, they do not need to submit transcripts for work done previous to their original attendance at CU nor do they need to pay an application fee. Since this process differs from a regular graduate applicant, students should fill out the Graduate Readmit Application. This form resides in Slate, so you must provide the link to the student (https://grad.apply.colorado.edu/register/readmit) and after they submit it, the readmit will be processed there using the same process as a regular application. Please notify gradprocessing@colorado.edu when you are having a student submit the Readmit Application.
Social Security Numbers (SSN)
All domestic students who do not provide a SSN when applying will receive an email after their application is submitted, requesting that they submit a form with their SSN. SSNs should not be emailed!

If the form is not submitted, students should call the Admissions call center at 303-492-6301 to provide their social security numbers over the phone so that our phone staff can enter the information on a secure form which will then be updated in CUSIS. They can also mail it to us by snail mail.

Registered students who are legally able to obtain a SSN are required to have one for the following reasons:
1. For tax reporting purposes. By federal law, the university must report the name, address, and SSN of every student who has paid tuition to the Internal Revenue Service (IRS) to certify education related tax credits.
2. To apply for and receive state/federal financial aid.
3. On-campus student employment.
4. Health services and the student health insurance program.
5. Informal credit relationships (past due charges for tuition, fees, housing, etc.).
6. Medical certification.

Term Changes
Applicants can change their term or defer their admission for up to one year. Admissions will process all term changes/deferrals, regardless of the application status as long as it is approved by the department. E-mail the change request form to Admissions at gradprocessing@colorado.edu or intlgrad@colorado.edu. Students who defer will be contacted by admissions in September for all following year terms.

Test Scores
Applicants are instructed to have any required official test scores sent to Institution Code: 4841. Applicants may self-report their test score information when they complete the online application.
- GRE, GMAT, and TOEFL scores are received directly from ETS.
- TOEFL/IELTS: International applicants are not required to submit scores if their native language is English, or if they have completed at least one year of full-time study at a U.S. institution, or at an institution in a country where English is the native language at the time they apply, and within two years from their desired admission term.
- DuoLingo: International applicants may report their official DuoLingo scores, by clicking ‘Send Results’ from inside the DuoLingo application, and then choosing, ‘University of Colorado Boulder – graduate.’

If you are missing GRE or GMAT scores for a student and s/he indicates s/he took the test, please e-mail the applicant’s name, identification number, and the date they took the test to your graduate processing liaison, subject line: Missing Test Scores.
Transcripts

♦ Unofficial Transcripts - For review and decision purposes applicants are required to upload an unofficial copy of their transcript(s) in the online application. We require one copy of the scanned transcript from each undergraduate and graduate institution attended.

♦ Official Transcripts – Only applicants who confirm their intent to enroll are asked to provide official transcripts (sent to us directly from previous institutions either by mail or electronically to gradprocessing@colorado.edu). Offers will not be considered final until we have received the official documents that match the uploaded records.

♦ CU System Transcripts – Your Graduate Admissions Team will run an internal transcript and upload it into Singularity for review.

♦ Electronic Transcripts – Will be accepted as long as they are sent directly from the issuing institution. Please forward these on to your graduate processing liaison. Be sure to forward the password as well, if one is included.

If you receive transcripts in your department from an applicant, please send them to the Graduate Admissions Team via the same method you received them.

♦ Mailed to you? Send them through campus mail to the Graduate Admissions Office (UCB 553)

♦ Emailed to you? Email to Graduate Admissions (GradProcessing@Colorado.edu)

Tuition Classification

In-state tuition eligibility requires one year of Colorado domicile (legal residence). Exceptions to the one year requirement are provided for: honorably-discharged members of the U.S. armed forces moving permanently to Colorado; active-duty military; Colorado National Guard members; children of faculty members at state-supported colleges; U.S. citizens who attended 3 years of high school in Colorado immediately prior to enrollment; and employees of companies moving to Colorado with State economic incentives. Information about the Colorado resident/nonresident regulations, including details of these exceptions is available on the Registrar’s website.

Included in the online application are questions to determine a student’s in-state tuition eligibility.

♦ Western Regional Graduate Program (WRGP) – provides in-state tuition in certain academic fields for residents of Alaska, Arizona, California, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming. Please refer to the http://wiche.edu/wrgp for a list of qualifying academic fields.

  a) As a part of your procedure for offering a TA or RA, departments participating in WRGP should consider asking the student to specify her or his state of legal residence. This could save the University’s funds that otherwise would pay the student’s out-of-state
tuition. Keep in mind that a student’s legal residence is often different from their mailing address.

**Application Processing Outside of Admissions and Other Special Circumstances**

**Secondary degrees** - A student is completing a secondary degree if they are completing degrees in two different departments. It is not considered a secondary degree if a student is completing a master’s degree while working toward the Ph.D. in the same department.

♦ Continuing domestic students who wish to add a secondary degree should complete the readmit application and submit it to the department. Transcripts and test scores for the student should already be in CUSIS/Onbase. It is up to the admitting department if they need additional materials (e.g. letters of reference, statement of purpose etc.)

a) If the new dept. wants to admit the student, send the completed Graduate Program Change/Addition/Discontinuation Form to the Registrar’s office via password-protected email attachment to iut@colorado.edu, via campus mail to 20 UCB, or in person to Regent Administrative Center room 101.

b) For continuing international students who are adding a secondary degree program, the department should send a readmit application with the admit decision indicated on it to international admissions at 65 UCB for processing so that they can do a review of the student’s immigration documentation.

**Level change from Master’s to Ph.D.** - Processes below are for adding a new degree level (student will have two program plan stacks) and for changing the existing degree level (student will have just one program plan stack).

♦ If a student is first admitted to a Master’s degree program and wants to add a Ph.D. in the same department (or vice versa) the department should complete the Graduate Program Change/Addition/Discontinuation Form.

a) Submit the completed form to the Registrar’s office via password-protected email attachment to iut@colorado.edu, via campus mail to 20 UCB, or in person to Regent Administrative Center room 101.

b) International students changing degree level or adding different level (either Master’s to PhD or vice versa) need new immigration documents to reflect the change. In order for those new documents to be issued, the student needs to demonstrate “proof of funding” for their new level of study. To change an international student’s level of study, please email brian.a.brown@colorado.edu, and include the following information: name and date of birth of the student, their current and new level, whether the student is completing their current level
and then changing, or continuing to work on their current degree while adding another, and the requirement term for the new level. Also, please attach any funding offer you are making to the student, or any updated financial statement you have received from the student for their new level. If the financial information is not included in this email, the Office of Admissions will ask the student for it directly. There is no need to submit a form or get the student to complete a new application— the email will suffice.

♦ If the student is active in your department in only a master’s program and wishes to pursue a PhD instead of the master’s (or is currently active only as a PhD in your department and wishes to change to a master’s instead), these changes can be done by the graduate program assistant as a major change on the program/plan stack. If it is an international student, be sure to contact ISSS at adviser@colorado.edu before making any changes.

DECISION LETTERS

You must use the Acceptance Letter template that has been created by the Graduate School:

- Letter of Acceptance with Offer of Aid

You may want to incorporate information from the Employment Verification letter into your international offer letters so you don’t have to write a second letter in order for your students on appointment to obtain a Social Security Number. Make sure your offer letters for international students include the start date so they can get a Social Security Number.

All Letters of Acceptance

♦ Indicate to the applicant that the offer of admission is not considered official until they receive the official notice of admission from the Admissions Office.
♦ Inform the applicant that their admission will not be considered complete until they confirm their intent to enroll on their status page: grad.apply.colorado.edu/apply/status
♦ You may want to include information regarding an advisor and their contact information.
♦ Include any required steps for registration or preparation that are important for your students to know before they arrive.
♦ If you have a department orientation you may want to include that information and the dates.
♦ If your department has a program to bring admitted applicants to campus for a visit, please be sure to include that information or other appropriate information about special events or activities that may begin before classes.
♦ If you have a confirmation deadline you should include that information.

No Aid

♦ If you are not able to award an appointment or aid during the first year, or will not offer aid at any time during the student’s program of study, please make this clear.
Support May be Possible Later

♦ When you mention that you will be making financial support decisions and offers later, try to mention a specific time frame so the applicant knows when they might expect to hear from you.

With Offer of Aid

♦ This letter shows an example for use with a TA appointment. The letter can be customized to explain the type of appointment you are offering. The type of detail shown in this example is particularly important for international applicants. The International Admission Team will use the financial information provided in your offer letter to determine if the applicant has adequate funding.

♦ It is important to give a clear and accurate representation of how stipends and tuition waivers are applied. You should also include information about the number of credits covered by your tuition waiver as well as the percentage of appointment and the expected number of hours of work that percentage translates to. Salary spreadsheets with this information are available on the Graduate School website.

♦ If you require your TA’s to participate in the Graduate Teacher Program or other departmental training or orientation programs, be sure to include that information.

♦ We support a resolution by CGS (Council of Graduate Schools) which states that institutions who are offering some kind of financial support CANNOT expect an answer from their admitted applicants before 4/15.

   a) It is further agreed by the institutions and organizations subscribing to the Resolution that a copy of this Resolution should accompany every scholarship, fellowship, traineeship, and assistantship offer. If you are sending offer letters (with financial support) electronically, please include a link to the CGS resolution so your applicants can review the resolution.

♦ Please see the Offer Letter Template available on the Graduate School website for job offers to teaching assistants, graduate part-time instructors, and graduate assistants.

Provisional Admit

♦ Be sure to explain what provisional admission means. You should enclose a copy of the provisional application indicating the deficiencies and the conditions to be met. In addition, please describe any pertinent details regarding those conditions as you see in the sample letter.

Conditional Admit

♦ For students that you are admitting conditionally through your department, include information regarding the conditions as outlined in your department’s admissions standard.

With Deficiencies

♦ The key is to inform your applicant of the deficiencies that exist and how you expect those to be met, including a time frame for completion of the additional requirements.

Denial Letter

♦ You want to be kind and yet clear about the decision. You may be able to eliminate questions by including information such as what is included in your evaluation (see sample) and letting the applicant know the average academic qualifications of those that were accepted.
