

FROM THE INSIDE OUT

The Fight for Environmental Justice
within Government Agencies

JILL LINDSEY HARRISON

It is now widely accepted that America's poorest communities, communities of color, and Native American communities suffer disproportionate harm from environmental hazards, with higher exposure to pollution and higher incidence of lead poisoning, cancer, asthma, and other diseases linked to environmental ills.

Learn how bureaucrats resist, undermine, and disparage environmental justice reform—and how environmental justice reformers within the agencies fight back by trying to change regulatory practice and culture from the inside out.
