

From Lab to Entrepreneurship: The eCortex Case Study and CU Resources In Support of ICS Tech Transfer

Dave Jilk, CEO, Standing Cloud

Brad Bernthal, Director of Entrepreneurial Initiatives, Silicon Flatirons Center, Colorado Law School

Kate Tallman, Director of Technology Transfer, UC-Boulder

(via phone) Randy O'Reilly, Professor, Psychology and Neurology, ICS

This discussion addresses how ICS research discoveries and inventions intersect with commercial possibilities. Serial entrepreneur Dave Jilk (CEO of eCortex Inc.) and co-founder Professor Randy O'Reilly will discuss their research and start-up company, eCortex. eCortex leverages ICS-related software technology developed to model brain processes in neuroscience. Additionally, Associate Clinical Professor Brad Bernthal, who leads the Entrepreneurial Initiatives for the Silicon Flatirons Center, will highlight resources across campus and in the community available to support faculty and graduate students. And Kate Tallman, UC-Boulder Director of Technology Transfer, will discuss the process involved in CU technology transfer. Discussion will be approximately an hour with an additional time available for Q&A.
