

Application for Undergraduate Research Assistantship in Ehringer Lab

A few comments:

Our lab has friendly atmosphere where all students are encouraged to ask questions and make observations or suggestions about projects. However, it is important you understand a research position is an important commitment of your time, energy, and mental power. I expect you to conduct your responsibilities on time, and that you communicate with your supervisor (a postdoctoral fellow or graduate student) if you will not be here or will be late. Our lab policy is to request "time off" at least 48 hours in advance so we can make accommodations for others to complete your duties. I also expect that after receiving thorough training, you will be able to perform many of your daily tasks independently, in a timely, neat, and organized manner, as demonstrated during your training.

Date _____ Interested start date _____

Name _____

Major _____

Class standing _____

GPA _____ GPA in major _____

Have you taken:

Statistics Yes No Grade _____

Molecular biology Yes No Grade _____

Genetics Yes No Grade _____

Which project most interests you (human genes related to addiction *or* mouse model of alcohol preference and exercise)?

How many hours per week can you work (minimum 8-10)? _____

Are you available 1 hour on Sat and/or Sunday? _____

What do you want to gain from the research experience?

What are your long-term career goals?
