If American Politics Research Lab UNIVERSITY OF COLORADO BOULDER

## About the Study:

## American Politics Research Lab

The American Politics Research Lab (APRL) is housed in the Department of Political Science at the University of Colorado Boulder. APRL is a non-partisan academic unit that supports basic research, educational activities, and public engagement on issues related to American politics. Lab faculty, student fellows, and affiliates pursue scholarly activities over a broad range of topics, utilizing a wide variety of research methodologies and analysis. Current lab projects include research on political behavior, state and local politics, and political agendas and recurring legislation in the U.S. Congress. The Lab is also home to the annual Colorado Political Climate Survey. APRL hosts a seminar series that includes talks by lab associates as well as distinguished scholars doing work related to the study of American politics.

## Colorado Political Climate Survey

In December 2023, the American Politics Research Lab (APRL) conducted the eighth annual Colorado Political Climate (CPC) survey. The CPC is a survey of the political and policy attitudes of Coloradans. The study is designed to gauge the public's political and partisan leanings, their opinions on a number of key issues facing the state, their attitudes toward major statewide and national political figures, and the outlook for the 2024 elections.

## Methodology

The sample consists of 800 individual responses, and is weighted to be representative of adult Colorado residents/the general state population. The weighted margin of error for the general population analysis is +/- 4.23\%. The survey was designed to take respondents roughly 10 minutes to complete.

The survey instrument was developed by APRL in the fall of 2023; it was administered online to a panel of Coloradans by the company YouGov between December 1-18, 2023. YouGov selected respondents from its internet panel, matching respondents to a sampling frame on gender, race, education, and age. YouGov's sampling frame is created from multiple data sources, including the American Community Study, the 2020 Current Population Survey, the 2020 National Election Pool exit poll, and 2020 Cooperative Election Study surveys.

To generalize to Colorado residents, YouGov employed a weighting procedure based on demographics and political characteristics (specifically, gender, age, race, education and 2020 presidential vote choice). We use YouGov's weights for all analysis. The complete codebook can be found here - it contains additional information on how YouGov constructed the sample and weights. The original survey instrument and programming
instructions can be found here. Finally, additional information on the YouGov's methodology and margin of error for similar/past CPC studies can be found here.

## Acknowledgements

We would like to acknowledge Rachel O'Neal (instructor) and the undergraduate students in the PSCI 3155: Survey Design and Analysis class at the University of Colorado Boulder; they provided assistance in the development of this survey. We also wish to thank the CU Boulder Department of Political Science and the LeRoy Keller Center for the Study of the First Amendment for financial support.

2.Economic Conditions ..... 27-28
Policies and Issues
1.Cost of Living ..... 29
2.Colorado Tax Payer Bill of Rights (TABOR) ..... 30
3.Black Lives Matter ..... 31
4.Gun Regulation ..... 32
5.Climate Change ..... 33
6.Race Relations ..... 34
7.Reaction to Dobbs Decision ..... 35
8. Support for Israel and Ukraine ..... 36-37
Demographpic Breakdown of Weighted Sample ..... 38

## Topline Summary:

Between December $1^{\text {st }}$ and December $18^{\text {th }}$ 2023, APRL conducted a survey of Colorado voters by contracting with YouGov, a public opinion and data company. Questions concerned the upcoming 2024 contests, evaluations of state and national figures, and public opinion about a variety of other issues. In this topline report, we focus on the 2024 contests, the public's approval of state and national political figures, Coloradans' attitudes toward elections and election processes, and Coloradans' opinions on a variety of issues, both foreign and domestic.

A Note on Partisan Breakdowns: In the summary discussion and tables that follow (where we present numbers by partisanship), we construct the splits using self-reported partisanship collected from respondents; this was measured via a traditional 7-point scale. We then categorize "leaning partisans" in with other partisans - thus, the category of "Independents" represents a smaller number of "pure" Independents, or just the middlecategory on the 7-point party identification scale. This grouping is backed by research suggesting that leaning partisans often behave similarly to stronger partisans. For more information, see https://www.pewresearch.org/politics/2015/11/23/appendix-a-why-partisans-include-leaners/. Additional descriptives for partisanship and other demographic characteristics are presented in the appendix.

For the analyses with the weights (which were created by YouGov using the information noted on pages 1-2; see also the linked documents), the partisan composition of the sample - employing this grouping based on self-reported partisanship - is as follows:

General Population Analysis, Partisan Composition of Sample

|  | Democrats <br> (Including <br> "Leaners") | Independents <br> ("Pure"- <br> no leaners) | Republicans <br> (Including <br> "Leaners") |
| :--- | :--- | :--- | :--- |
| Weighted Percent | 35 | 35 | 30 |
| Weighted <br> Observations | 263 | 263 | 229 |

Total Weighted Observations (excluding responses of "some other party"): 754 Note: Numbers are rounded, so splits and total may not sum exactly.

## Upcoming 2024 Contests

We asked our sample of adult Coloradans about two potential 2024 presidential election scenarios: Biden vs. Trump, and Biden vs. the now former candidate for the GOP nomination, Ron DeSantis (DeSantis was still in the GOP nomination race while our survey was in the field). Biden leads in both match-ups, though his lead is smaller in the head-to-head with Trump (47-40). In the Biden vs. Trump contest we see predictable
partisan splits: 88\% of self-identified Democrats indicated they plan to vote for Biden, while $85 \%$ of self-identified Republicans indicated they plan to vote for Trump. Biden leads with independents in our sample (46-34), and holds a lead among female respondents (49-36).

Democrats lead in the generic congressional ballot, with Coloradans saying they would vote for the Democratic candidate over the Republican one (49-42). Female respondents prefer the Democratic candidate (51-39), while independents prefer the generic Democratic candidate by 10 percent (49-39).

## Leadership and Approval

Reflecting other national polling, adult Coloradans disapprove of Biden's job performance (50-42). These numbers also show predictable partisan splits, though what's perhaps most notable is Biden's 78\% job approval among Colorado Democrats (seemingly tepid in an era of extreme polarization), and his 38\% approval among independents.

Governor Polis receives better marks than Biden, with Coloradans approving of his job performance (49-37), and independents approving by a ten percent spread (44-34).

Senator Hickenlooper is also "above water," with job approval outpacing disapproval (4336). Senator Bennet posts a larger margin of approval to disapproval (41-29), but nearly a third $(30 \%)$ of respondents report being "not sure" what they think about his job performance, while $43 \%$ of independents report being "not sure" what they think about his performance.

Coloradans disapprove of the job prominent Congresswoman Lauren Boebert (CO-3) is doing ( $29 \%$ approve/46\% disapprove). [Note that approval of Boebert was asked of all Coloradans, not just those residing in her (former) Congressional district.] Not surprisingly, she receives particularly poor marks from Democrats in our sample (63\% disapproval), but also receives negative ratings among independents (48\% disapproval). Boebert records fairly tepid support from Colorado Republicans (57\% approval/24\% disapproval).

## Approval of Institutions

Like most Americans, Coloradans disapprove of the U.S. Congress (61-24). Approval is particularly low among independents, registering just 11\%.

Overall, Coloradans are split in their approval of the U.S. Supreme Court (43\% approve/41\% disapprove/16\% Not sure). However, these overall patterns mask clear partisan differences, with a majority of Democrats disapproving (60\%), and a sizable majority of Republicans (75\%) approving. Independents disapprove of the Supreme Court's performance (41\%-32\%).

Respondents approve of the Colorado State Legislature (49-33), though again these overall numbers mask partisan dynamics (73\% approval among Democrats; 34\% approval among Republicans). Independents approve of the state legislature 43-34.

Coloradans approve of their local police and their county officials, both overall and in our Democratic and Republican splits. Perhaps unsurprisingly, support for local police is highest among self-identified Republicans (74\% approval), though it is still solid among Democrats (58\%) and independents (55\%).

## Trust in the 2024 Elections

In looking ahead to the 2024 elections, Coloradans agree that "elections across the country will be conducted fairly and accurately" (52\% agree/32\% disagree/16\% not sure). However, there are some troubling partisan splits on these and related items, with $75 \%$ of Democrats expressing agreement with the aforementioned statement, but only $41 \%$ of Republicans doing the same (while 46\% of independents agree).

Coloradans are more confident that "elections in Colorado will be conducted fairly and accurately," with $68 \%$ expressing agreement (18\% disagree/15\% not sure). That said, as with most contemporary polling, we see partisan splits for this item as well, though these are more muted than for the companion questions about the national level: 88\% of Democrats agree, $63 \%$ of independents agree, and $54 \%$ of Republicans agree with this statement.

## Trust in Government

Coloradans' trust in the federal government is low, with less than $20 \%$ saying that they either "always" or "most of the time" trust the federal government to "do what is in the public's best interest." These numbers climb to just under $40 \%$ when respondents are asked about Colorado's state government, and are similar when local government is the subject of inquiry. Democrats' trust in state government is considerably higher (over 60\% report "always" or "most of the time" trusting) than is Republicans' and independents' trust in state government.

## Economic Conditions

As of late mid-December, 2023, Coloradans remained pessimistic about the state of the national economy, with less than a quarter saying its condition was "excellent" or "good." Assessments are quite politicized, with over 40\% of Democrats saying the U.S. economy is "excellent" or "good," and only 14\% of Republicans reporting the same.

Respondents feel slightly better about the state of the economy in Colorado, with roughly $1 / 3$ of respondents rating the economy as "excellent" or "good." Partisan splits are again pronounced here, as over half of Democrats rate the Colorado economy as "good" or "excellent," while less than a quarter of Republicans do the same. One thing that does unite Coloradans is a concern over the cost of living in Colorado, with over 75\% of
respondents reporting that they are "very" or "somewhat" concerned about the cost of living in the state. Indeed, on this particular question majorities of Democrats, Republicans, and independents all register such a response.

## Other Issues

Climate Change: Overall, Coloradans remain concerned about climate change, with over half reporting that they are personally "very concerned" or "concerned" about the issue. This pattern is driven by partisan differences, with a large majority of Democrats reporting concern over the issue, just under half of independents doing the same, and less than $1 / 3$ of Republicans reporting that they are "very" or "somewhat" concerned about it.

TABOR: A slim majority of Coloradans support keeping the Colorado Tax Payer Bill of Rights in place ( $54 \%$ favor/18\% oppose/27\% Not Sure). Republicans lead this charge, with $72 \%$ favoring, followed by $50 \%$ of independents. Democrats are split on the issue, with $47 \%$ favoring keeping it the law, $26 \%$ opposing it, and $27 \%$ saying they are "not sure."

The Dobbs Decision: A slim majority of Coloradans remain disapproving of the Supreme Court's overturning of Roe v. Wade in the summer of 2022. As expected, there are substantial partisan splits: roughly $60 \%$ of Republicans approve of the decision, while roughly 70\% of Democrats oppose it. Independents oppose the decision (54\% oppose/24\% favor/22\% Not Sure).

Gun Regulation: A majority of Coloradans (56\%) favor the federal government making it "more difficult for individuals to purchase a gun." There are, unsurprisingly, substantial partisan splits on the issue (83\% approval among Democrats; 69\% disapproval among Republicans). The majority of independents - $57 \%$ - favor more gun regulation by the federal government.

Support for Israel: Coloradans favor "the US government sending aid to Israel in its war with Hamas," though the support is not overwhelming (48\% favor/36\% oppose/16\% Not sure). There are some partisan differences on the issue, with roughly two-thirds of Republicans favoring the U.S. sending aid to Israel, but just under half of Democrats responding similarly.

Support for Ukraine: Coloradans also favor "the US government sending aid to Ukraine in its war with Russia," with $53 \%$ expressing support ( $36 \%$ express opposition, 12\% report being "not sure"). Per usual, we see partisan splits on this issue as well: over $70 \%$ of Democrats support aid to Ukraine, while a slim majority of Republicans oppose sending aid (51\% oppose).

## 2024 Election Match-Ups

## 1. The Presidential Election

Note: Analysis in each of the following done using general population weights (observations are weighted). Due to rounding, each column may not sum to exactly $100 \%$.

Question Text: If next year's election for President were held today and was between these candidates, would you vote for:
a. Biden v. Trump

## The Presidential Election

| Joe Biden | $47 \%$ |
| :--- | :---: |
| Donald Trump | $40 \%$ |
| Other | $13 \%$ |
| Observations | $\mathbf{7 9 5}$ |

| Presidential Election by Gender |  |  |
| :--- | :---: | :---: |
|  | Male | Female |
| Joe Biden | $45 \%$ | $49 \%$ |
| Donald Trump | $43 \%$ | $36 \%$ |
| Other | $12 \%$ | $15 \%$ |
| Observations | 402 | $\mathbf{3 9 3}$ |

Presidential Election by Partisanship

|  | Democrats | Republicans | Independents |
| :--- | :---: | :---: | :---: |
| Joe Biden | $88 \%$ | $5 \%$ | $46 \%$ |
| Donald Trump | $10 \%$ | $85 \%$ | $34 \%$ |
| Other | $2 \%$ | $10 \%$ | $19 \%$ |
| Observations | $\mathbf{2 6 3}$ | $\mathbf{2 2 9}$ | $\mathbf{2 5 8}$ |

## b. Biden v. DeSantis

## The Presidential Election

| Joe Biden | $46 \%$ |
| :--- | :---: |
| Ron DeSantis | $33 \%$ |
| Other | $20 \%$ |
| Observations | 800 |

## Presidential Election by Gender

|  | Male | Female |
| :--- | :---: | :---: |
| Joe Biden | $46 \%$ | $47 \%$ |
| Ron DeSantis | $34 \%$ | $33 \%$ |
| Other | $21 \%$ | $20 \%$ |
| Observations | $\mathbf{4 0 2}$ | $\mathbf{3 9 8}$ |

| Presidential Election by Partisanship |  |  |  |
| :--- | :---: | :---: | :---: |
|  | Democrats | Republicans | Independents |
| Joe Biden | $88 \%$ | $4 \%$ | $45 \%$ |
| Ron DeSantis | $6 \%$ | $69 \%$ | $32 \%$ |
| Other | $6 \%$ | $27 \%$ | $23 \%$ |
| Observations | $\mathbf{2 6 3}$ | $\mathbf{2 2 9}$ | $\mathbf{2 6 3}$ |

## 2. The Generic Ballot

Note: Analysis in each of the following done using general population weights (observations are weighted). Due to rounding, each column may not sum to exactly $100 \%$.

Question Text: If next year's election for U.S. House of Representatives in your congressional district were held today, would you vote for:

## The Generic Ballot

| Democratic Candidate | $49 \%$ |
| :--- | ---: |
| Republican Candidate | $42 \%$ |
| Other | $9 \%$ |
| Observations | $\mathbf{7 9 9}$ |

| Generic Ballot by Gender |  |  |
| :--- | :---: | :---: |
|  | Male | Female |
| Democratic Candidate | $48 \%$ | $51 \%$ |
| Republican Candidate | $44 \%$ | $39 \%$ |
| Other | $8 \%$ | $10 \%$ |
| Observations | $\mathbf{4 0 2}$ | $\mathbf{3 9 7}$ |

Generic Ballot by Partisanship

|  | Democrats | Republicans | Independents |
| :--- | :---: | :---: | :---: |
| Democratic Candidate | $94 \%$ | $4 \%$ | $49 \%$ |
| Republican Candidate | $5 \%$ | $93 \%$ | $39 \%$ |
| Other | $2 \%$ | $3 \%$ | $13 \%$ |
| Observations | $\mathbf{2 6 3}$ | $\mathbf{2 2 9}$ | $\mathbf{2 6 1}$ |

## Leadership and Approval

## 1. Public Figures

Note: Analysis in each of the following done using general population weights (observations are weighted). Due to rounding, each column may not sum to exactly $100 \%$. "Strongly (dis)approve" and "(dis)approve" categories are combined.

Question Text: How much do you approve or disapprove of the way that each of the following is handling their job?
a. President Joe Biden

## Biden Approval Ratings

| Approve | $42 \%$ |
| :--- | :--- |
| Disapprove | $50 \%$ |
| Not Sure | $7 \%$ |
| Observations | $\mathbf{8 0 0}$ |

Biden Approval Ratings by Partisanship

|  | Democrats | Republicans | Independents |

## Proposition HH Aftermath

Note: Analysis in each of the following done using general population weights (observations are weighted). Due to rounding, each column may not sum to exactly 100\%. "Strongly (dis)agree," "(dis)agree," and "slightly (dis)agree" categories are combined.

## Question Text:

Proposition HH appeared on the 2023 Colorado state ballot and was defeated by voters. The language of the measure was as follows:

Shall the state reduce property taxes for homes and businesses, including expanding property tax relief for seniors, and backfill counties, water districts, fire districts, ambulance and hospital districts, and other local governments and fund school districts by using a portion of the state surplus up to the proposition HH cap as defined in this measure?

How much do you agree with each of the following statements about Proposition HH?

Statement: I was supportive of the proposition.
Proposition HH Support

| Agree | $45 \%$ |
| :--- | :--- |
| Disagree | $40 \%$ |
| Not Sure | $15 \%$ |
| Observations | $\mathbf{8 0 0}$ |

## Proposition HH Support by Vote Status

|  | Voted | Did Not Vote |
| :--- | :---: | :---: |
| Agree | $50 \%$ | $35 \%$ |
| Disagree | $44 \%$ | $32 \%$ |
| Not Sure | $6 \%$ | $33 \%$ |
| Observations | $\mathbf{5 3 6}$ | $\mathbf{2 6 4}$ |

Proposition HH Support by Partisanship

|  | Democrats | Republicans | Independents |
| :--- | :---: | :---: | :---: |
| Agree | $63 \%$ | $37 \%$ | $34 \%$ |
| Disagree | $28 \%$ | $55 \%$ | $43 \%$ |
| Not Sure | $9 \%$ | $8 \%$ | $24 \%$ |
| Observations | $\mathbf{2 6 3}$ | $\mathbf{2 2 9}$ | $\mathbf{2 6 3}$ |

Statement: I have a good understanding of what the proposition would have done.

## Proposition HH Understanding

| Agree | $69 \%$ |
| :--- | :--- |
| Disagree | $22 \%$ |
| Not Sure | $9 \%$ |
| Observations | $\mathbf{8 0 0}$ |

## Proposition HH Understanding by Vote Status

|  | Voted | Did Not Vote |

| Observations | $\mathbf{2 6 3}$ | $\mathbf{2 2 9}$ | $\mathbf{2 6 3}$ |

## Demographic Breakdown of Weighted Sample

Note: Partisanship used throughout is from a self-reported 7-point measure, where Strong Democrats, Democrats, and Leaning Democrats are considered Democrats, Strong Republicans, Republicans, and Leaning Republicans are considered Republicans, and self-identified Independents are Independents. This is noted below as "Partisanship." Due to rounding, numbers may not sum to exactly $100 \%$.

| Partisanship | Democrats | Republicans | Independents |
| :--- | :---: | :---: | :---: |
| Partisanship | $35 \%$ | $30 \%$ | $35 \%$ |
| Observations | 263 | 229 | $\mathbf{2 6 3}$ |

Note: The tables below present the weighted percentages and observation counts for gender, race, income, and age for the general population analysis (observations are weighted with the general population weight). Due to rounding, numbers may not sum to exactly $100 \%$. For raw descriptive breakdown of these demographics in the unweighted sample, please see the codebook linked at the beginning of this document.

| Gender | Male | Female |
