April 2026

April in the Greenhouse

Hello EBIO Greenhouse enthusiasts. We have had a very busy April. The month started off with the Plant Ecology class exploring the space through a biome scavenger hunt. After that, we had numerous tours with the public, BVSD, and Science Bound class.

We wrapped up the month with a visit from the Vice Chancellor for Sustainability's office. The team was able to explore how the greenhouse supports CU's mission for sustainability and explore

the space in the same way as the students.

Our community propagation day was a success, with multiple RSVPs for tours & donations!

Behind the scenes, I met with multiple groups for future events. This includes multiple tours with a variety of the CU Science Discovery summer camps ages K-12. Additionally, we are working to get on the map for the CU Boulder Culture Crawl campus wide event Sept. 30th.

Finally, we said goodbye to our semester long TA, Seth, who helped us update our collection inventory. He was invaluable to our progress and we can't wait to post it on the website for public viewing.
