

ASPECT IN PERFORMATIVE CONTEXTS ACROSS LANGUAGES

Astrid De Wit (Université Libre de Bruxelles, FNRS) &
Frank Brisard (University of Antwerp)

[In collaboration with Michael Meeuwis (University of
Ghent) and Laura Michaelis (University of Colorado at
Boulder)]

1. INTRODUCTION: A FIRST GLANCE AT THE ASPECTUAL CHARACTERISTICS OF PERFORMATIVES

1. *Introduction*

2. Hypothesis and research questions

3. Method

4. Results and discussion

5. Conclusion

- Performative utterances are special in that they involve illocutionary acts that can be performed simply “by uttering a sentence containing an expression that names the type of speech act” (Searle 1989: 536) (e.g. *I promise, I hereby cancel the meeting*).

1. INTRODUCTION: A FIRST GLANCE AT THE ASPECTUAL CHARACTERISTICS OF PERFORMATIVES

1. *Introduction*

2. Hypothesis and research questions

3. Method

4. Results and discussion

5. Conclusion

- Performative utterances are special in that they involve illocutionary acts that can be performed simply “by uttering a sentence containing an expression that names the type of speech act” (Searle 1989: 536) (e.g. *I promise, I hereby cancel the meeting*).
- Most work on performatives concentrates on English (e.g. Austin 1962; Searle 1989, among many others).

1. INTRODUCTION: A FIRST GLANCE AT THE ASPECTUAL CHARACTERISTICS OF PERFORMATIVES

1. *Introduction*

2. Hypothesis and research questions

3. Method

4. Results and discussion

5. Conclusion

→ Unlike most reports of events ongoing at the time of speaking in English, performative utterances make use of the simple present rather than the present progressive:

○ Cf. *I promise to come; I order you to leave; I beg you for forgiveness.*

versus **I walk home right now; *Be quiet, I sleep.*

1. INTRODUCTION: A FIRST GLANCE AT THE ASPECTUAL CHARACTERISTICS OF PERFORMATIVES

1. *Introduction*

2. Hypothesis and research questions

3. Method

4. Results and discussion

5. Conclusion

- Performative utterances analyzed as involving **perfective** aspect marking in English (by, e.g., Brinton (1988), Smith (1997: 110-112, 185-186), Williams (2002: 128-166) and De Wit (2017)).
→ They involve events that can be viewed in their entirety at the time of speaking.

1. INTRODUCTION: A FIRST GLANCE AT THE ASPECTUAL CHARACTERISTICS OF PERFORMATIVES

1. *Introduction*

2. Hypothesis and research questions

3. Method

4. Results and discussion

5. Conclusion

- Performative utterances analyzed as involving **perfective** aspect marking in English (by, e.g., Brinton (1988), Smith (1997: 110-112, 185-186), Williams (2002: 128-166) and De Wit (2017)).
 - They involve events that can be viewed in their entirety at the time of speaking.
 - Assuming that performatives have the same special status across languages, one might predict that, in other languages too, performative utterances systematically select perfective rather than imperfective (progressive) aspect.

1. INTRODUCTION: A FIRST GLANCE AT THE ASPECTUAL CHARACTERISTICS OF PERFORMATIVES

1. *Introduction*

2. Hypothesis and research questions

3. Method

4. Results and discussion

5. Conclusion

BUT: In Slavic languages, performatives most frequently select **imperfective** aspect (cf. e.g. Dickey 2000), and in this respect they behave just like any other present-tense utterance in Slavic.

1. INTRODUCTION: A FIRST GLANCE AT THE ASPECTUAL CHARACTERISTICS OF PERFORMATIVES

1. *Introduction*

2. Hypothesis and research questions

3. Method

4. Results and discussion

5. Conclusion

BUT: In Slavic languages, performatives most frequently select **imperfective** aspect (cf. e.g. Dickey 2000), and in this respect they behave just like any other present-tense utterance in Slavic.

→ Starting point: What are the aspectual characteristics of performatives in a cross-linguistic sample of languages?

2. HYPOTHESIS AND RESEARCH QUESTIONS

1. Introduction

2. *Hypothesis
and research
questions*

3. Method

4. Results and
discussion

5. Conclusion

- There's not one single type of aspect that is dedicated to being used in performative contexts across languages.

2. HYPOTHESIS AND RESEARCH QUESTIONS

1. Introduction

*2. Hypothesis
and research
questions*

3. Method

4. Results and
discussion

5. Conclusion

- There's not one single type of aspect that is dedicated to being used in performative contexts across languages.
- Instead, assuming that aspectual constructions (also) have an epistemic meaning, we hypothesize the following generalization:

In performative contexts, languages prefer the aspectual construction that is generally used to report situations that are fully and instantly identifiable at the time of speaking as an instance of a certain situation type.

2. HYPOTHESIS AND RESEARCH QUESTIONS

- Most present-time situations are **not** fully and instantly identifiable

1. Introduction

*2. Hypothesis
and research
questions*

3. Method

4. Results and
discussion

5. Conclusion

2. HYPOTHESIS AND RESEARCH QUESTIONS

- Most present-time situations are **not** fully and instantly identifiable
- More specifically, most present-time **events** are not fully and instantly identifiable: cf. Langacker (2001) on the epistemic and durational problems involved in present-time event reports

1. Introduction

2. *Hypothesis
and research
questions*

3. Method

4. Results and
discussion

5. Conclusion

2. HYPOTHESIS AND RESEARCH QUESTIONS

- Most present-time situations are **not** fully and instantly identifiable

→ Exceptions:

- *Stative situations*
- *Habitual and generic events*
- *Live sports commentaries*
- *Demonstrations*
- *Narratives*
- *Instructions*
- *AND performatives*

2. HYPOTHESIS AND RESEARCH QUESTIONS

- Most present-time situations are **not** fully and instantly identifiable

→ Exceptions:

- *Stative situations*
- *Habitual and generic events*
- *Live sports commentaries*
- *Demonstrations*
- *Narratives*
- *Instructions*
- *AND performatives*

→ Same aspectual cxn for each of these contexts.

2. HYPOTHESIS AND RESEARCH QUESTIONS

- If performatives systematically select the aspectual cxn used for fully and instantly identifiable events, this implies that they will not feature progressive aspect.

1. Introduction

*2. Hypothesis
and research
questions*

3. Method

4. Results and
discussion

5. Conclusion

2. HYPOTHESIS AND RESEARCH QUESTIONS

1. Introduction

2. *Hypothesis
and research
questions*

3. Method

4. Results and
discussion

5. Conclusion

- If performatives systematically select the aspectual cxn used for fully and instantly identifiable events, this implies that they will not feature progressive aspect.
 - As shown in, a.o., Güldemann (2003), De Wit & Patard (2013), De Wit & Brisard (2014), Anthonissen et al. (2016; submitted), various languages use the progressive to express situations that have an epistemically *contingent* (i.e. non-structural) status within the speaker's conception of reality at a given reference time → cf. our talk *The Epistemic Meaning of the Progressive*
- Situations reported by means of a progressive are situations that are perceived as random/non-predictable and thus not representative of the structure of the world.

2. HYPOTHESIS AND RESEARCH QUESTIONS

1. Introduction

2. *Hypothesis
and research
questions*

3. Method

4. Results and
discussion

5. Conclusion

- If performatives systematically select the aspectual cxn used for fully and instantly identifiable events, this implies that they will not feature progressive aspect.
 - As shown in, a.o., Güldemann (2003), De Wit & Patard (2013), De Wit & Brisard (2014), Anthonissen et al. (2016; submitted), various languages use the progressive to express situations that have an epistemically *contingent* (i.e. non-structural) status within the speaker's conception of reality at a given reference time → cf. our talk *The Epistemic Meaning of the Progressive*
- Situations reported by means of a progressive are situations that are perceived as random/non-predictable and thus not representative of the structure of the world.
- <> (General) imperfective aspect, which can be used in stative contexts.

2. HYPOTHESIS AND RESEARCH QUESTIONS

1. Introduction

*2. Hypothesis
and research
questions*

3. Method

4. Results and
discussion

5. Conclusion

Two research questions:

- **RQ1:** Do we indeed find that, cross-linguistically, performative utterances feature the same aspectual construction as is used for the expression of other fully and instantly identifiable situations? → Epistemic clustering?
- **RQ2:** Is it true that performative utterances never feature progressive aspect?

3. METHODOLOGY: NATIVE SPEAKER ELICITATIONS AND MULTIDIMENSIONAL SCALING

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. Results and
discussion

5. Conclusion

- Native speaker elicitation and consultation of existing analyses for 16 languages: Modern Standard Arabic, Kilivila, Japanese, Farsi, English, Mandarin Chinese, Spanish, Lingala, Bosnian/Croatian/Serbian, Russian, Czech, Catalan, Icelandic, Kirundi, Hindi and Turkish.

3. METHODOLOGY: NATIVE SPEAKER ELICITATIONS AND MULTIDIMENSIONAL SCALING

1. Introduction

2. Hypothesis
and research
questions

3. *Method*

4. Results and
discussion

5. Conclusion

- Native speaker elicitation and consultation of existing analyses for 16 languages: Modern Standard Arabic, Kilivila, Japanese, Farsi, English, Mandarin Chinese, Spanish, Lingala, Bosnian/Croatian/Serbian, Russian, Czech, Catalan, Icelandic, Kirundi, Hindi and Turkish.
- Questionnaire - method Dahl (1985), e.g.:
 - Item 3: *My brother [TO KNOW] (present) that she [TO LOVE] him (present).*
 - Item 19: [soldier to general:] *I [TO BEG] you to let me go.*

3. METHODOLOGY: NATIVE SPEAKER ELICITATIONS AND MULTIDIMENSIONAL SCALING

- Questionnaire consists of 3 parts:
 - *Part 1*: Identification of basic tense/aspect categories (e.g. present stative, present ongoing atelic, past perfective).
 - *Part 2*: Contexts involving all fully and instantly identifiable situations apart from performatives (e.g. sports commentaries, demonstrations etc).
 - *Part 3*: Performative events: different types of performative, according to classification Searle (1989).

3. METHODOLOGY: NATIVE SPEAKER ELICITATIONS AND MULTIDIMENSIONAL SCALING

- Questionnaire data: a sample

	B	C	D	E	F	G	H	I
	Arabic	Japanese	Kilivala	Lingala	Kirundi	Farsi	Hindi	
Current ongoing atelic (prog)	a1	j1	kil1	l1	k1	f1 or f2	h1	
Current ongoing telic (prog)	a1	j1	kil1	l1	k1	f1 or f2	h1	
Current ongoing atelic (prog)	a1/a3	j1	kil1	l1	k1	f1 or f2	h1	
Present stative copula	no verb	no verb	no verb	l2	k2	f1	h2	
Present stative	a1	j1 / j1	kil1/kil1	l2 / l2	k3/k8	f1 / f1	h2/h2 (but see quest)	
Past perfective (sequence)	a2 / a2	j4 / j2	kil2 / kil2	l3 / l3	k4/k3	f3 / f3	h3 / h3	
Future perfective (sequence)	a1 or a4 / a1	j4 j3 / j3 (t5)	kil3	l4 / l4	k5/k6	f1 or f4 / f1	h4 / h5	
Recipes	a1/a6	j3	kil1	l2 / l2	k3	f1	h6	
Stage directions atelic	a1	j3	kil3	l2	k3	f1	h6	
Stage directions telic sequence	a1	j3	kil1	l2 / l2	k3/k3	f1	h6/h6	
Demonstrations	a1	j3	kil1	l2/l2	k3/k7	f1	h6/h6	
Instructions (specific right now)	a6	j3	kil1	l2/l2	k3/k7	f1	h6/h6	
Instructions (more general)	a1/a6	j3	kil1	l4 / l1	k6/k3	f1/f1	h6	
Sports commentaries single	a1	j2	kil1	l2	k9	f1	h3	
Sports commentaries sequence	a1 / a1 / a1	j4 / j4 / j2	kil1/kil1/kil1	l2/l2/l2	k9/k9/k9	f1/f1/f1	h3 / h3 / h3	
Generic	a1	j3	kil1 or (kil4)	l5	k3	f1	h8	
Frequentative	a1	j3	kil1 or (kil4)	l5 / l5	k9b/k3/k9b	f1	h6 / h2	
Habitual	a1	j3	kil1	l5	k3	f1	h8	
Meta-comment presentation	a1	j3	kil3	l1 or l2	k9	f1	h6	
Performative representative	a1/a1 a5	j3 (j5) / j3	non-verbal expression / k	l2/l4	k9/k5	f1/f1	h6	
Non-performative representative	a1 / a4 a1 / a1 / a4	j1 / j3 / j1 / j3	kil1 / kil3 / kil1 / kil3	l1 or l2 / l4 / l2 / l4	k9/k5/k9/k5	f1/f1/f1/f1	h1 / h1	
Performative directive authority	a1	j3	kil1	l2	k9	f1	h6	
Non-performative directive	a1	j1	kil1	l1 or l2	k1	f2	h6	
Performative directive no authority	a1	j3	kil1	l1 or l2	k9	f1	h6	
Performative commissive	a1	j3(do promise)	kil1	l2	k9	f1	h6	
Non-performative commissive	a1	j1	kil1	l2 (progr onmogelijik)	k1	f2	h6	
Performative expressive (thank)	a1	j3(do gratitude)	kil1 (noun)	l2	k9	f1	h6	
Performative expressive (apologize)	a3	j3 (do apology)	kil1	l2	k9	f1	h6	
Non-performative expressive	a1	j1	kil1	l1 / l1 (maybe l2)	k1	f2	h1	
Performative declaration (dedicate)	a1	j3	kil1 (no verb)	l2 or l1	k9	f1	h6	
Performative declaration (resign)	a1	j3	kil1	l2	k9	f1	h6	
Non-performative declaration	a1	j3	kil1	l1	k1	f1	h1	
Performative declaration (declare)	a1 / non verbal	j3 / j3	kil1 / kil1	l1 or l2	k9/k9b	f1	h6	

- 1. Introduction
- 2. Hypothesis and research questions
- 3. Method
- 4. Results and discussion
- 5. Conclusion

3. METHODOLOGY: NATIVE SPEAKER ELICITATIONS AND MULTIDIMENSIONAL SCALING

- How do we measure semantic similarity of a large range of categories across a sample of languages?

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. Results and
discussion

5. Conclusion

3. METHODOLOGY: NATIVE SPEAKER ELICITATIONS AND MULTIDIMENSIONAL SCALING

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. Results and
discussion

5. Conclusion

- How do we measure semantic similarity of a large range of categories across a sample of languages?
→ Multidimensional scaling (MDS; Croft & Poole 2008)

3. METHODOLOGY: NATIVE SPEAKER ELICITATIONS AND MULTIDIMENSIONAL SCALING

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. Results and
discussion

5. Conclusion

- How do we measure semantic similarity of a large range of categories across a sample of languages?
→ Multidimensional scaling (MDS; Croft & Poole 2008)
- MDS has been developed to visualize the relationships between a large set of data (meanings) that are similar to each other along many dimensions, and represent them on a one- or two-dimensional map.

3. METHODOLOGY: NATIVE SPEAKER ELICITATIONS AND MULTIDIMENSIONAL SCALING

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. Results and
discussion

5. Conclusion

- How do we measure semantic similarity of a large range of categories across a sample of languages?
→ Multidimensional scaling (MDS; Croft & Poole 2008)
- MDS has been developed to visualize the relationships between a large set of data (meanings) that are similar to each other along many dimensions, and represent them on a one- or two-dimensional map.
- The closer two categories/meanings are to each other on the map, the more likely they are to receive the same formal expression (i.e. the more semantically related they are).

3. METHODOLOGY: NATIVE SPEAKER ELICITATIONS AND MULTIDIMENSIONAL SCALING

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. Results and
discussion

5. Conclusion

- How do we measure semantic similarity of a large range of categories across a sample of languages?
→ Multidimensional scaling (MDS; Croft & Poole 2008)
- MDS has been developed to visualize the relationships between a large set of data (meanings) that are similar to each other along many dimensions, and represent them on a one- or two-dimensional map.
- The closer two categories/meanings are to each other on the map, the more likely they are to receive the same formal expression (i.e. the more semantically related they are).
- Ideal to visualize epistemic clustering.

4. RESULTS AND DISCUSSION

A first observation...

- Languages resort to a variety of aspectual constructions in performative utterances (without significant differentiation between types of performative), e.g. imperfectives, present perfects, perfectives, aspectually ambiguous constructions...

1. Introduction
2. Hypothesis and research questions
3. Method
4. *Results and discussion*
5. Conclusion

4. RESULTS AND DISCUSSION

A first observation...

- Languages resort to a variety of aspectual constructions in performative utterances (without significant differentiation between types of performative), e.g. imperfectives, present perfects, perfectives, aspectually ambiguous constructions...

→ No one preferred aspectual construction in the world's languages for performative contexts.

4. RESULTS AND DISCUSSION

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. *Results and
discussion*

5. Conclusion

*RQ1: Do performatives and other contexts involving fully and instantly identifiable situations generally receive the same formal expression? Do we find **epistemic clustering**?*

4. RESULTS AND DISCUSSION

- *RQ 1*: Epistemic clustering
- Measuring the semantic similarity of different categories via MDS
- For reasons of legibility: each category is labelled by means of a letter, e.g.

Current ongoing atelic <i>do</i>	A	Instructions (specific right now) 1	R
Current ongoing telic <i>write</i>	B	Instructions (specific right now) 2	S
Current ongoing atelic <i>speak</i>	C	Instructions (more general) 1	T
Present stative copula	D	Instructions (more general) 2	U
Present stative 1	E	Sports commentaries single	V
Present stative 2	F	Sports commentaries sequence 1	W
Past perfective (sequence) 1	G	Sports commentaries sequence 2	X
Past perfective (sequence) 2	H	Sports commentaries sequence 3	Y

→ Measuring the semantic similarity of different categories via MDS

4. RESULTS AND DISCUSSION

- *RQ 1: Epistemic clustering*

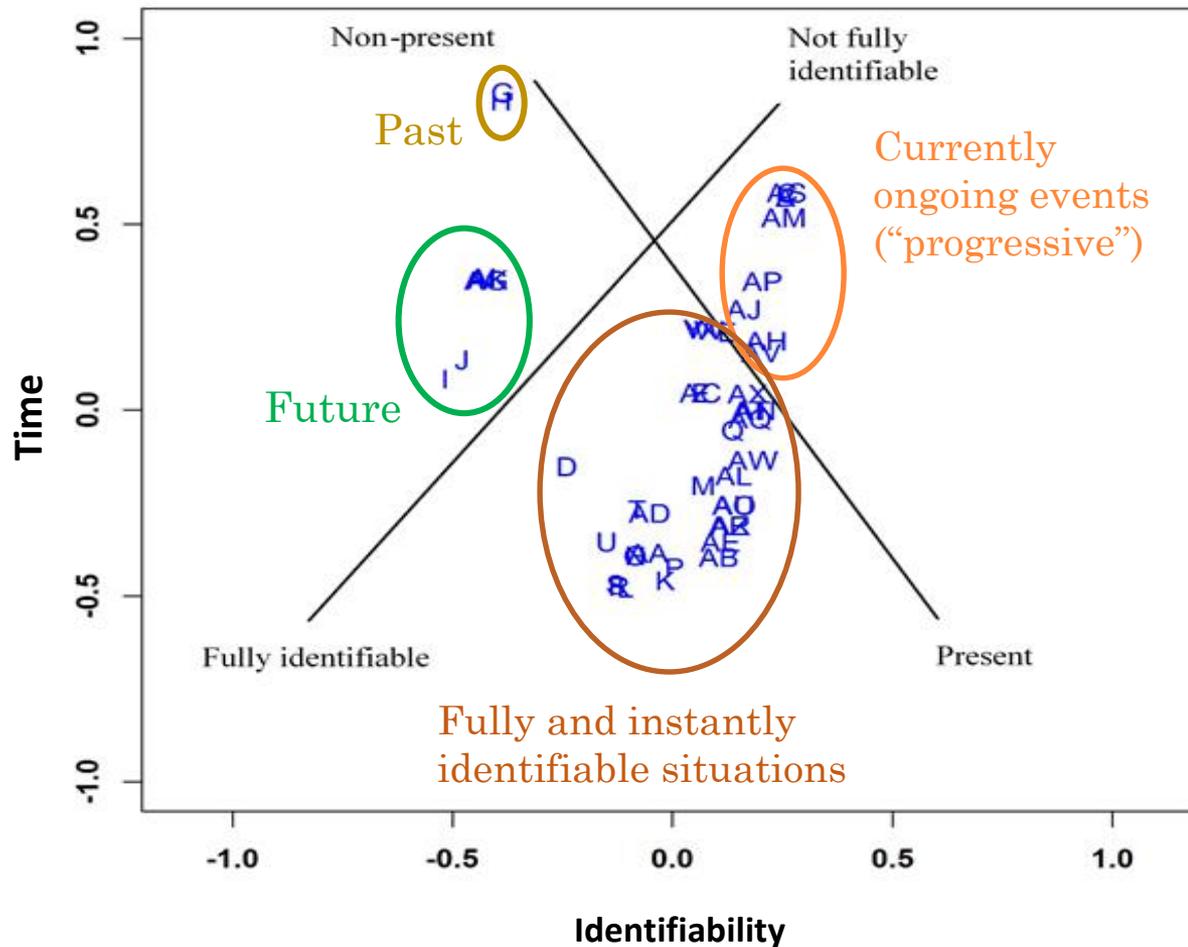

→ Measuring the semantic similarity of different categories via MDS

4. RESULTS AND DISCUSSION

- In a large majority of the items in our questionnaires, the form used for performatives is also the one used for the expression of present states, instructions, stage directions (narratives), demonstrations, generic situations and habitual situations → the construction indicating full and exact identifiability → ‘epistemic clustering’. [Note: live sports broadcasting does not seem to be part of this cluster]

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. *Results and
discussion*

5. Conclusion

4. RESULTS AND DISCUSSION

- In a large majority of the items in our questionnaires, the form used for performatives is also the one used for the expression of present states, instructions, stage directions (narratives), demonstrations, generic situations and habitual situations → the construction indicating full and exact identifiability → ‘epistemic clustering’.
- Which particular aspect/tense construction this is depends on language-internal factors.

- 1. Introduction
- 2. Hypothesis and research questions
- 3. Method
- 4. *Results and discussion*
- 5. Conclusion

4. RESULTS AND DISCUSSION

- In a large majority of the items in our questionnaires, the form used for performatives is also the one used for the expression of present states, instructions, stage directions (narratives), demonstrations, generic situations and habitual situations → the construction indicating full and exact identifiability → ‘epistemic clustering’.
- Which particular aspect/tense construction this is depends on language-internal factors.
- No *complete* correspondence between the form used for performatives and the form used for the expression of other structural events, due to the characteristics of individual languages (e.g. Lingala has a dedicated habitual marker; the Japanese *-te iru* construction can be used with present states, but *also* for the expression of progressivity).

4. RESULTS AND DISCUSSION

- *RQ 2: Is progressive aspect never used in performative contexts?*

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. *Results and
discussion*

5. Conclusion

4. RESULTS AND DISCUSSION

- *RQ 2: Is progressive aspect never used in performative contexts?*
- None of the languages that has a progressive construction (Japanese, Lingala, Kirundi, Farsi, Hindi, Chinese, Icelandic, Spanish, Catalan, and English) makes use of this construction in performative contexts.

4. RESULTS AND DISCUSSION

- *RQ 2: Is progressive aspect never used in performative contexts?*
- None of the languages that has a progressive construction (Japanese, Lingala, Kirundi, Farsi, Hindi, Chinese, Icelandic, Spanish, Catalan, and English) makes use of this construction in performative contexts.
- Languages that have general imperfectives *can* use them for the expression of performativity: Slavic, Arabic, Turkish.

4. RESULTS AND DISCUSSION

- But what about the following English examples (adopted from the COCA corpus)?
 - *I'm **warning** you, Rosie, don't fool around with this one.*
 - *I've done something wrong. I **am asking** for your forgiveness.*
 - *I'm **dedicating** this fight to all the African people who are fighting for their freedom and independence!*

4. RESULTS AND DISCUSSION

- But what about the following English examples (adopted from the COCA corpus)?
 - *I'm **warning** you, Rosie, don't fool around with this one.*
 - *I've done something wrong. I **am asking** for your forgiveness.*
 - *I'm **dedicating** this fight to all the African people who are fighting for their freedom and independence!*

→ True performatives

4. RESULTS AND DISCUSSION

- But what about the following English examples (adopted from the COCA corpus)?
 - *I'm **warning** you, Rosie, don't fool around with this one.*
 - *I've done something wrong. I **am asking** for your forgiveness.*
 - *I'm **dedicating** this fight to all the African people who are fighting for their freedom and independence!*

→ True performatives

→ Apparent counterexamples to the general restriction on progressive performatives?

4. RESULTS AND DISCUSSION

- Some observations about the use of the progressive in English performatives (De Wit & Michaelis ms.):
 1. Simple present still much more frequently used in performative contexts than the progressive

- 1. Introduction
- 2. Hypothesis and research questions
- 3. Method
- 4. *Results and discussion*
- 5. Conclusion

4. RESULTS AND DISCUSSION

- Some observations about the use of the progressive in English performatives (De Wit & Michaelis ms.):
 1. Simple present still much more frequently used in performative contexts than the progressive
 2. Progressive aspect primarily found with performative verbs from the exercitive class (e.g. *warn, order, beg...*)

- 1. Introduction
- 2. Hypothesis and research questions
- 3. Method
- 4. *Results and discussion*
- 5. Conclusion

4. RESULTS AND DISCUSSION

- Some observations about the use of the progressive in English performatives (De Wit & Michaelis ms.):
 1. Simple present still much more frequently used in performative contexts than the progressive
 2. Progressive aspect primarily found with performative verbs from the exercitive class (e.g. *warn, order, beg...*)
 3. Progressive aspect hardly ever found with performative verbs from the commissive, behabitive or verdictive classes (e.g. *promise, swear, apologize, denounce...*)

4. RESULTS AND DISCUSSION

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. *Results and
discussion*

5. Conclusion

→ Central claim: progressive only used to generate a special (again, epistemic) meaning effect: the performative is exceptionally construed as having a contingent status within current reality (De Wit & Michaelis ms).

4. RESULTS AND DISCUSSION

- Central claim: progressive only used to generate a special (again, epistemic) meaning effect: the performative is exceptionally construed as having a contingent status within current reality (De Wit & Michaelis ms).
- Contingent performatives & the data:
 - Inter-class differences: More natural to present relatively face-threatening acts like orders or warnings as something transient; commitments, verdictives and behabitives are preferably *not* presented as contingent

4. RESULTS AND DISCUSSION

1. Introduction
2. Hypothesis and research questions
3. Method
4. *Results and discussion*
5. Conclusion

→ Central claim: progressive only used to generate a special (again, epistemic) meaning effect: the performative is exceptionally construed as having a contingent status within current reality (De Wit & Michaelis ms).

- Contingent performatives & the data:
 - Inter-class differences: More natural to present relatively face-threatening acts like orders or warnings as something transient; commitments, verdictives and behabitives are preferably *not* presented as contingent
 - Within classes that allow progressive aspect: specific reasons to present a performative act as contingent:

- Tentativeness

As she walks, she mutters to herself... Jo: "I'm requesting... I'm... Captain, I'd like to request that I be the attorney assigned to rep -- I'd like to request that it be myself who is assigned to represent"-- (she stops) -- "That it be myself who is assigned to represent?"

4. RESULTS AND DISCUSSION

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. *Results and
discussion*

5. Conclusion

→ Central claim: progressive only used to generate a special (again, epistemic) meaning effect: the performative is exceptionally construed as having a contingent status within current reality (De Wit & Michaelis ms).

○ Contingent performatives & the data:

- More natural to present relatively face-threatening acts like orders or warnings as something transient; commitments, verdictives and behabitives are preferably *not* presented as contingent
- Within classes that allow progressive aspect: specific reasons to present a performative act as contingent:

○ Emphasis

I'm dedicating this fight to all the African people who are fighting for their freedom and independence!

4. RESULTS AND DISCUSSION

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. *Results and
discussion*

5. Conclusion

→ Central claim: progressive only used to generate a special (again, epistemic) meaning effect: the performative is exceptionally construed as having a contingent status within current reality (De Wit & Michaelis ms).

○ Contingent performatives & the data:

- More natural to present relatively face-threatening acts like orders or warnings as something transient; commitments, verdictives and behabitives are preferably *not* presented as contingent
- Within classes that allow progressive aspect: specific reasons to present a performative act as contingent:

○ Temporarily assumed authority

Dorothy: "Marvelous! How do I get there?" Officer: "I warn you, Miss Simple, once you go that way you can't come back to Primanproper, Massachusetts!"

versus

He wags a finger in his sister's face. "I 'm warning you, Rosie, don't fool around with this one."

4. RESULTS AND DISCUSSION

→ Progressive performatives in English are exceptions that prove the rule: performatives normally select that construction that is used to express full and instant identifiability (in English, the simple present); if they do not (i.e. if they receive progressive marking in English), then the performative is presented as in a way not fully and instantly identifiable.

1. Introduction

2. Hypothesis
and research
questions

3. Method

4. *Results and
discussion*

5. Conclusion

4. RESULTS AND DISCUSSION

1. Introduction

discussion*

5. Conclusion

→ Progressive performatives in English are exceptions that prove the rule: performatives normally select that construction that is used to express full and instant identifiability (in English, the simple present); if they do not (i.e. if they receive progressive marking in English), then the performative is presented as in a way not fully and instantly identifiable.

- Note: other in-depth language-individual studies might reveal further intricate variation:
 - Arabic: with ritualistic performatives (of the type *I pronounce you President*), perfective aspect is used → remnant from Classical Arabic?
 - Slavic: exceptional occurrences of perfective performatives (Dickey 2000; forthcoming; Israeli 2001; Wiemer 2014)

→ epistemic basis for variation?

5. CONCLUSION

- There are, cross-linguistically, no reasons to believe that performatives constitute a class that deserves “special” aspectotemporal marking (unlike what is suggested by English).
- The unique characteristics of performatives need to be situated at the level of their epistemic features, in the sense that the events that they refer to are fully and instantly identifiable at the time of speaking.
- Cross-linguistically, performatives therefore generally behave grammatically (i.e., aspectotemporally) in the same way as utterances in other contexts with which they share these epistemic features, i.e. other contexts that involve structural events.
