

# **Climate Action Now Campaign**

## **Internship Opportunities with Conservation Colorado & Green Corps**

Opportunity to work (virtually) with Conservation Colorado's "Climate Action Now" campaign to advance climate action bills in the 2021 Colorado State Legislative session.

These bills will ensure that we have the tools to implement and enforce Colorado's Greenhouse Gas (GHG) Pollution Reduction Roadmap. Over the next few months, the campaign will organize community events, collect petition signatures, and build a broad coalition of local groups and businesses to push our elected officials to support immediate climate legislation.

We need passionate and dedicated interns to help us achieve our goals and initiate climate action throughout the state.

The opportunities this spring are unique for elevating climate action legislation by encouraging CO State Senators Rodriguez and Coleman, among others, to support bills that are critical to Governor Polis' GHG Reduction Roadmap. Coloradans are already feeling the impacts of climate change on our state through wildfires, increased drought, public health crises and more. The Colorado State legislature has the opportunity to provide the necessary resources and support that is needed to effectively address climate change with a multitude of bills being introduced in the 2021 legislative session. Conservation Colorado is working to protect Colorado's environment and quality of life by mobilizing people and doubling down on Colorado's pro-conservation policymakers.
